## Overview

Chart 1	Merchandise trade by selected region, 1999	1
Chart 2	World merchandise trade and output growth by major product group, 1999	3
Chart 3	World merchandise trade by product, 1999	4
Chart 4	Commercial services trade by selected region, 1999	5
Table 1	GDP and trade developments in North America, 1990-99	6
Chart 5	Latin America. Merchandise trade by country, 1990-99	7
Table 2	GDP and trade developments in Latin America, 1990-99	8
Table 3	GDP and trade developments in Western Europe, 1990-99	8
Chart 6	Western Europe. Merchandise trade by country, 1990-99	9
Table 4	GDP and trade developments in transition economies, 1995-99	10
Chart 7	Transition economies. Merchandise trade by country, 1995-99	11
Table 5	GDP and trade developments in Africa, 1990-99	12
Chart 8	Africa. Merchandise trade by country, 1990-99	13
Chart 9	Middle East. Merchandise trade by country, 1990-99	14
Table 6	Trade developments in the Middle East, 1990-99	15
Table 7	GDP and trade developments in Asia, 1990-99	15
Chart 10	Asia. Merchandise trade by country, 1990-99	16

## I. World trade in 1999 – Overview

Table I.1	Growth in the volume of world merchandise exports and production by major product group, 1990-99	17
Table I.2	Growth in the volume of world merchandise trade by selected region, 1990-99	17
Table I.3	Growth in the value of world merchandise trade by region, 1999	18
Table I.4	Growth in the value of world trade in commercial services by selected region, 1999	18
Table I.5	Leading exporters and importers in world merchandise trade, 1999	19
Table I.6	Leading exporters and importers in world merchandise trade (excluding intra-EU trade), 1999	20
Table I.7	Leading exporters and importers in world trade in commercial services, 1999	21
Table I.8	Share of goods and commercial services in the total trade of selected regions and economies, 1999	22
Table I.9	Merchandise trade of selected regional integration arrangements, 1999	23

## II. Selected long-term trends

Chart II.1	World merchandise trade and output by major product group, 1950-99	25
Chart II.2	World merchandise trade by major product group, 1950-99	26
Table II.1	World merchandise exports, production and gross domestic product, 1950-99	27
Table II.2	World merchandise trade by region and selected economy, 1948-99	28
Table II.3	Merchandise trade of North America by region and by product, 1963, 1973, 1983, 1993 and 1999	29
Table II.4	Merchandise trade of Western Europe by region and by product, 1963, 1973, 1983, 1993 and 1999	30
Table II.5	Merchandise trade of Japan by region and by product, 1963, 1973, 1983, 1993 and 1999	31
Table II.6	Merchandise exports of selected regions and economies to the least-developed countries, 1980-99	32
Table II.7	Merchandise imports of selected regions and economies from the least-developed countries, 1980-99	33

## III. Trade by region

### 1. Overview

Chart III.1	Value of world merchandise trade by region, 1992-99	35
Chart III.2	Volume of world merchandise trade by selected region, 1992-99	36
Table III.1	World merchandise exports by region, 1999	37
Table III.2	World merchandise imports by region, 1999	37
Table III.3	Intra- and inter-regional merchandise trade, 1999	38
Chart III.3	World trade in commercial services by selected region, 1992-99	39
Table III.4	World exports of commercial services by selected region, 1999	40
Table III.5	World imports of commercial services by selected region, 1999	40

## 2. North America

Table III.6	Merchandise trade of North America, 1999	41
Table III.7	Merchandise trade of North America by region and by major product group, 1999	41
Chart III.4	Merchandise trade of North America, 1989-99	41
Chart III.5	Share of North America in world merchandise trade, 1989-99	41
Table III.8	Merchandise exports of North America by product, 1999	42
Table III.9	Merchandise imports of North America by product, 1999	42
Table III.10	Merchandise exports of North America by destination, 1999	43
Table III.11	Merchandise imports of North America by origin, 1999	43
Table III.12	Gross domestic product and trade in goods and services of Canada and the United States, 1999	44
Table III.13	Merchandise exports and imports of Canada and the United States, 1999	44
Table III.14	Merchandise trade of Canada by region and economy, 1999	45
Table III.15	Merchandise trade of the United States by region and economy, 1999	46
Table III.16	Merchandise exports of NAFTA countries by destination, 1990-99	47
Table III.17	Trade in commercial services of Canada, 1999	48
Table III.18	Trade in commercial services of the United States, 1999	48

## 3. Latin America

Table III.19	Merchandise trade of Latin America, 1999	49
Table III.20	Merchandise trade of Latin America by region and by major product group, 1999	49
Chart III.6	Merchandise trade of Latin America, 1989-99	49
Chart III.7	Share of Latin America in world merchandise trade, 1989-99	49
Table III.21	Merchandise exports of Latin America by product, 1999	50
Table III.22	Merchandise exports of Latin America by destination, 1999	50
Table III.23	Leading merchandise exporters and importers in Latin America, 1999	51
Table III.24	Merchandise exports of MERCOSUR countries by region, 1990-99	52
Table III.25	Merchandise imports of MERCOSUR countries by region, 1990-99	53
Table III.26	Merchandise exports of ANDEAN countries by region, 1990-99	54
Table III.27	Merchandise imports of ANDEAN countries by region, 1990-99	55
Table III.28	Leading exporters and importers of commercial services in Latin America, 1999	56

## 4. Western Europe

Table III.29	Merchandise trade of Western Europe, 1999	57
Table III.30	Merchandise trade of Western Europe by region and by major product group, 1999	57
Chart III.8	Merchandise trade of Western Europe, 1989-99	57
Chart III.9	Share of Western Europe in world merchandise trade, 1989-99	57
Table III.31	Merchandise exports of Western Europe by product, 1999	58
Table III.32	Merchandise imports of Western Europe by product, 1999	58
Table III.33	Merchandise exports of Western Europe by destination, 1999	59
Table III.34	Merchandise imports of Western Europe by origin, 1999	59
Table III.35	Gross domestic product and trade in goods and services in Western Europe, 1999	60
Table III.36	Leading merchandise exporters and importers in Western Europe, 1999	61
Table III.37	Merchandise trade of European Union by region and economy, 1999	62
Table III.38	Leading exporters and importers of commercial services in Western Europe, 1999	63
Table III.39	Trade in commercial services of France, 1999	64
Table III.40	Trade in commercial services of Germany, 1999	64
Table III.41	Trade in commercial services of Italy, 1999	65
Table III.42	Trade in commercial services of the United Kingdom, 1999	65

## 5. Central and Eastern Europe, the Baltic States and the CIS (transition economies)

Table III.43	Merchandise trade of the Central and Eastern Europe, the Baltic States and the CIS, 1999	66
Table III.44	Merchandise trade of the Central and Eastern Europe, the Baltic States and the CIS by region and by major product group, 1999	66
Chart III.10	Merchandise trade of the Central and Eastern Europe, the Baltic States and the CIS, 1989-99	66
Chart III.11	Share of the Central and Eastern Europe, the Baltic States and the CIS in world merchandise trade, 1989-99	66
Table III.45	Merchandise exports of the Central and Eastern Europe, the Baltic States and the CIS by major product group and main destination, 1999	67
Table III.46	Relative importance of inter-regional trade in the total merchandise trade of the Baltic States and the CIS, 1999	67

Table III.47	Leading merchandise exporters and importers in Central and Eastern Europe, the Baltic States and the CIS, 1999	68
Table III.48	Merchandise exports of selected Central and Eastern European countries by region, major trading partner, and major product group, 1997-99	69
Table III.49	Merchandise imports of selected Central and Eastern European countries by region, major trading partner, and major product group, 1997-99	70
Table III.50	Merchandise exports of selected economies to the Baltic States and the CIS, 1997-99	71
Table III.51	Merchandise imports of selected economies from the Baltic States and the CIS, 1997-99	72

## 6. Africa

Table III.52	Merchandise trade of Africa, 1999	73
Table III.53	Merchandise trade of Africa by region and by major product group, 1999	73
Chart III.12	Merchandise trade of Africa, 1989-99	73
Chart III.13	Share of Africa in world merchandise trade, 1989-99	73
Table III.54	Merchandise exports of Africa by major product group and main destination, 1999	74
Table III.55	Merchandise exports of Africa by destination, 1999	74
Table III.56	Leading merchandise exporters and importers in Africa, 1999	75
Table III.57	Merchandise exports of the European Union to developing countries in Africa by product, 1999	76
Table III.58	Merchandise imports of the European Union from developing countries in Africa by product, 1999	76

## 7. Middle East

Table III.59	Merchandise trade of the Middle East, 1999	77
Table III.60	Merchandise trade of the Middle East by region and by major product group, 1999	77
Chart III.14	Merchandise trade of the Middle East, 1989-99	77
Chart III.15	Share of the Middle East in world merchandise trade, 1989-99	77
Table III.61	Merchandise exports of the Middle East by major product group and main destination, 1999	78
Table III.62	Merchandise exports of the Middle East by destination, 1999	78
Table III.63	Fuel imports of selected regions and economies from the Middle East, 1990 and 1999	79
Table III.64	Leading merchandise exporters and importers in the Middle East, 1999	79

## 8. Asia

Table III.65	Merchandise trade of Asia, 1999	80
Table III.66	Merchandise trade of Asia by region and by major product group, 1999	80
Chart III.16	Merchandise trade of Asia, 1989-99	80
Chart III.17	Share of Asia in world merchandise trade, 1989-99	80
Table III.67	Merchandise exports of Asia by main product group and main destination, 1999	81
Table III.68	Merchandise exports of Asia by product, 1999	82
Table III.69	Merchandise exports of Asia by destination, 1999	82
Table III.70	Leading merchandise exporters and importers in Asia, 1999	83
Table III.71	Merchandise trade of Japan by region and by economy, 1999	84
Table III.72	Merchandise exports of the United States, European Union and Japan to China by major product, 1999	85
Table III.73	Merchandise imports of the United States, European Union and Japan from China by major product, 1999	86
Table III.74	Merchandise exports of ASEAN countries by region, 1990-99	87
Table III.75	Merchandise imports of ASEAN countries by region, 1990-99	88
Table III.76	Merchandise trade of Asian economies in financial crisis by region, 1999	89
Chart III.18	Merchandise trade of Asian economies in financial crisis, 1995-00	89
Table III.77	Leading exporters and importers of commercial services in Asia, 1999	90
Table III.78	Trade in commercial services of Japan, 1999	91

## IV. Trade by sector

### 1. Overview

Chart IV.1	World merchandise exports by product, 1990 and 1999	93
Table IV.1	World merchandise exports by product, 1999	93
Chart IV.2	World exports of commercial services by category, 1990, 1995 and 1999	94
Table IV.2	World exports of commercial services by category, 1999	94

## 2. Agricultural products

Table IV.3	World trade in agricultural products, 1999	95
Table IV.4	Major regional flows in world exports of agricultural products, 1999	95
Table IV.5	Share of agricultural products in trade in total merchandise and in primary products by region, 1999	95
Chart IV.3	Regional shares in world trade in agricultural products, 1999	95
Table IV.6	Exports of agricultural products by region, 1999	96
Table IV.7	Leading exporters and importers of agricultural products, 1999	97
Table IV.8	Exports of agricultural products of selected economies, 1990-99	98
Table IV.9	Imports of agricultural products of selected economies, 1990-99	99

### 2.1. Food

Table IV.10	World trade in food, 1999	100
Table IV.11	Major regional flows in world exports of food, 1999	100
Table IV.12	Share of food in trade in total merchandise and in primary products by region, 1999	100
Chart IV.4	Regional shares in world trade in food, 1999	100
Table IV.13	Exports of food by principal region, 1999	101
Table IV.14	Imports of food into the European Union, North America and Japan by region, 1999	102
Table IV.15	Leading exporters and importers of food, 1999	103

## 3. Mining products

Table IV.16	World trade in mining products, 1999	104
Table IV.17	Major regional flows in world exports of mining products, 1999	104
Table IV.18	Share of mining products in trade in total merchandise and in primary products by region, 1999	104
Chart IV.5	Regional shares in world trade in mining products, 1999	104
Table IV.19	Exports of mining products by region, 1999	105

### 3.1 Fuels

Table IV.20	World trade in fuels, 1999	106
Table IV.21	Major regional flows in world exports of fuels, 1999	106
Table IV.22	Share of fuels in trade in total merchandise and in primary products by region, 1999	106
Chart IV.6	Regional shares in world trade in fuels, 1999	106
Table IV.23	Fuels imports of selected economies by region and supplier, 1999	107
Table IV.24	Imports of fuels of selected economies, 1990-99	109

## 4. Manufactures

Table IV.25	World trade in manufactures, 1999	110
Table IV.26	Major regional flows in world exports of manufactures, 1999	110
Table IV.27	Share of manufactures in total merchandise trade by region, 1999	110
Chart IV.7	Regional shares in world trade in manufactures, 1999	110
Table IV.28	Exports of manufactures by region, 1999	111
Table IV.29	Trade in manufactures of the United States, European Union and Japan by region, 1999	112
Table IV.30	Leading exporters and importers of manufactures, 1999	113
Table IV.31	Exports of manufactures of selected economies, 1990-99	114
Table IV.32	Imports of manufactures of selected economies, 1990-99	115

### 4.1 Iron and steel

Table IV.33	World trade in iron and steel, 1999	116
Table IV.34	Major regional flows in world exports of iron and steel, 1999	116
Table IV.35	Share of iron and steel in trade in total merchandise and in manufactures by region, 1999	116
Chart IV.8	Regional shares in world trade in iron and steel, 1999	116
Table IV.36	Exports of iron and steel by principal region, 1999	117
Table IV.37	Iron and steel imports of the European Union and the United States by region and supplier, 1999	118
Table IV.38	Leading exporters and importers of iron and steel, 1999	119

## 4.2 Chemicals

Table IV.39	World trade in chemicals, 1999	120
Table IV.40	Major regional flows in world exports of chemicals, 1999	120
Table IV.41	Share of chemicals in trade in total merchandise and in manufactures by region, 1999	120
Chart IV. 9	Regional shares in world trade in chemicals, 1999	120
Table IV.42	Exports of chemicals by principal region, 1999	121
Table IV.43	Leading exporters and importers of chemicals, 1999	122

## 4.3 Machinery and transport equipment

Table IV.44	World trade in machinery and transport equipment, 1999	123
Table IV.45	Major regional flows in world exports of machinery and transport equipment, 1999	123
Table IV.46	Share of machinery and transport equipment in trade in total merchandise and in manufactures by region, 1999	123
Chart IV.10	Regional shares in world trade in machinery and transport equipment, 1999	123
Table IV.47	Exports of machinery and transport equipment by principal region, 1999	124
Table IV.48	Leading exporters and importers of machinery and transport equipment, 1999	125
Table IV.49	Exports of machinery and transport equipment of selected economies, 1990-99	126
Table IV.50	Imports of machinery and transport equipment of selected economies, 1990-99	127

### *Office machines and telecom equipment*

Table IV.51	World trade in office machines and telecom equipment, 1999	128
Table IV.52	Major regional flows in world exports of office machines and telecom equipment, 1999	128
Table IV.53	Share of office machines and telecom equipment in trade in total merchandise and in manufactures by region, 1999	128
Chart IV.11	Regional shares in world trade in office machines and telecom equipment, 1999	128
Table IV.54	Exports of office machines and telecom equipment by principal region, 1999	129
Table IV.55	Imports of office machines and telecom equipment of selected economies by region and supplier, 1999	130
Table IV.56	Leading exporters and importers of office machines and telecom equipment, 1999	132
Table IV.57	Exports of office machines and telecom equipment of selected economies, 1990-99	133
Table IV.58	Imports of office machines and telecom equipment of selected economies, 1990-99	134

### *Automotive products*

Table IV.59	World trade in automotive products, 1999	135
Table IV.60	Major regional flows in world exports of automotive products, 1999	135
Table IV.61	Share of automotive products in trade in total merchandise and in manufactures by region, 1999	135
Chart IV.12	Regional shares in world trade in automotive products, 1999	135
Table IV.62	Exports of automotive products by principal region, 1999	136
Table IV.63	Imports of automotive products of selected economies by region and supplier, 1999	137
Table IV.64	Leading exporters and importers of automotive products, 1999	138
Table IV.65	Exports of automotive products of selected economies, 1990-99	139
Table IV.66	Imports of automotive products of selected economies, 1990-99	140

## 4.4 Textiles

Table IV.67	World trade in textiles, 1999	141
Table IV.68	Major regional flows in world exports of textiles, 1999	141
Table IV.69	Share of textiles in trade in total merchandise and in manufactures by region, 1999	141
Chart IV.13	Regional shares in world trade in textiles, 1999	141
Table IV.70	Exports of textiles by principal region, 1999	142
Table IV.71	Textile imports of selected economies by region and supplier, 1999	143
Table IV.72	Leading exporters and importers of textiles, 1999	145
Table IV.73	Exports of textiles of selected economies, 1990-99	146
Table IV.74	Imports of textiles of selected economies, 1990-99	147

## 4.5 Clothing

Table IV.75	World trade in clothing, 1999	148
Table IV.76	Major regional flows in world exports of clothing, 1999	148

Table IV.77	Share of clothing in trade in total merchandise and in manufactures by region, 1999	148
Chart IV.14	Regional shares in world trade in clothing, 1999	148
Table IV.78	Exports of clothing by principal region, 1999	149
Table IV.79	Clothing imports of selected economies by region and supplier, 1999	150
Table IV.80	Leading exporters and importers of clothing, 1999	152
Table IV.81	Exports of clothing of selected economies, 1990-99	153
Table IV.82	Imports of clothing of selected economies, 1990-99	154

## 5. Commercial services

### 5.1 Transportation services

Table IV.83	World exports of transportation services, 1999	155
Chart IV.15	World exports of transportation services and share in total commercial services, 1992-99	155
Table IV.84	Share of transportation services in total trade of commercial services by selected region, 1999	155
Chart IV.16	Regional shares in world trade in transportation services, 1999	155
Table IV.85	Leading exporters and importers of transportation services, 1999	156

### 5.2 Travel services

Table IV.86	World exports of travel services, 1999	157
Chart IV.17	World exports of travel services and share in total commercial services, 1992-99	157
Table IV.87	Share of travel services in total trade of commercial services by selected region, 1999	157
Chart IV.18	Regional shares in world trade in travel services, 1999	157
Table IV.88	Leading exporters and importers of travel services, 1999	158

### 5.3 Other commercial services

Table IV.89	World exports of other commercial services, 1999	159
Chart IV.19	World exports of other commercial services and share in total commercial services, 1992-99	159
Table IV.90	Share of other commercial services in total trade of commercial services by selected region, 1999	159
Chart IV.20	Regional shares in world trade in other commercial services, 1999	159
Table IV.91	Leading exporters and importers of other commercial services, 1999	160

## Appendix tables

Table A1	World merchandise exports, production and gross domestic product, 1989-99	161
Table A2	Network of world merchandise trade by region, 1997-99	162

# Overview

## 1. Main features of trade developments in 1999

In the course of 1999, global economic output gained momentum and international trade growth accelerated markedly, reversing the downward trend prevailing until the first quarter of 1999. The recovery in Asia and the continued high growth of output in North America provided the major stimulus to international trade. Restraining factors for the expansion of trade were the deceleration of economic activity in Western Europe together with a decline in output in South and Central America. As the dynamic and contractionary forces balanced each other, the overall rate of trade growth remained unchanged at about 5% in volume terms (i.e., adjusted for price changes). The value of world merchandise exports rose by 3.5% and that of commercial services exports by 1.5% to US\$5.47 trillion and US\$1.35 trillion, respectively.

The strength of GDP growth in Asia and North America led to double digit import growth in these regions. By contrast weaker demand growth in Western Europe halved the region's real import growth if compared with 1998, and the sluggish overall growth in Latin America caused a small decrease in imports. Imports of Africa and the transition economies have slumped in 1999 as their relatively large current account deficits could no longer be financed by capital inflows. Although the strength of intra-regional trade lifted North America's and Asia's real export growth above the global average, their export expansion lagged well behind import expansion. All other regions experienced an excess of export over import growth in 1999 due to sluggish domestic demand growth – providing yet another demonstration of how international trade can attenuate swings in regional business cycles. In North America, international trade contributed to reduce the risks of an overheated economy, while in Latin America and Western Europe it sustained employment and mobilized otherwise idle production capacity.

Looking at trade developments by sector, the fastest growth in value terms could be observed for fuels, office and telecom equipment and automotive products. A decline in international

trade was registered for all major categories of primary products, except fuels, as well as for textiles and iron and steel. The value increase of all three major services categories, transport, travel and other commercial services remained very moderate.

Developing country merchandise exports rose by 9%, increasing their share in world exports in 1999 to 26.5%. The higher share was not only due to the recovery in fuels trade; the larger shares for the developing countries could also be observed for all nine groups of manufactures. In agricultural trade, however, the developing countries' share decreased slightly last year. Taking the period 1990-1999, however, there is consistently an increase in the developing countries' share of total merchandise exports, both in agricultural and manufactured goods. Among manufactured goods, the strongest gains are observed for office and telecom equipment; automotive products and chemicals also expanded annually at double digit rates over the 1990s. For the developing countries as a group, manufactured goods account now for more than two thirds of merchandise exports.

The least-developed countries also saw their merchandise exports increase faster than world merchandise trade. Exports of mining products (including fuels) increased by about one fifth and that of manufactures by about 5%. For agricultural products, however, shipments decreased largely due to lower prices. Available data point to a stagnation or moderate increase in least-developed countries' imports in 1999.

What are the main factors that explain the international trade landscape for 1999? Besides overall economic growth, capital flows and trade policy are the major determinants of international trade flows. The impact of trade policy changes on regional trade patterns is generally seen only over the medium term, while changes in capital flows often have immediate repercussions on year-to-year trade developments. Other factors, such as commodity prices and exchange rate variations also had a notable impact on nominal trade values.

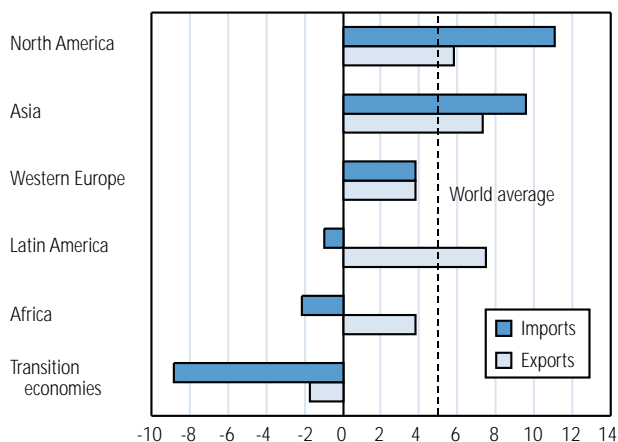

International capital flows remained a major factor in shaping international trade developments in 1999. The sharp increase in the US current account deficit was financed by a record capital inflow. United States domestic investment expenditure stayed strong while the share of savings of private households to disposable income fell to a historically low level. Despite rather sluggish GDP growth, FDI inflows into Latin America continued to increase, thereby dampening the impact of lower portfolio investments and the repayment of bank loans. In 1999, FDI inflows alone exceeded the region's current account deficit. As net capital flows (private and official) to developing Asia remained rather small in 1999, the sizeable current account surplus of Asia was predominantly used to increase the foreign exchange reserves. In contrast to Latin America, IMF estimates indicate that net FDI inflows into Asia decreased for the second year in a row. Net FDI inflows into the transition economies increased slightly to a new peak level of US\$20.5 billion in 1999, although other private capital and official capital flows turned negative. In fact, total net capital flows to all transition economies were reduced by nearly one half to US\$14.6 billion. Much of this reduction is accounted for by capital outflows from Russia.

Summarizing the main features of capital developments in 1999, one can observe that capital flows were increasingly directed to North America and Latin America and that the share of foreign direct investment and securities in total capital flows expanded sharply. At the same time, international bank loans to

Chart 1

### Merchandise trade by selected region, 1999

(Annual percentage change in volume terms)

Source: Table 1.2

banks and non-banks decreased markedly. This implies that the stock of outstanding international bank loans was shrinking in 1999, reducing private banks' exposure to international credit risks.<sup>1</sup>

An important issue is the sustainability of the current pattern of international capital flows, given their role in financing large current account deficits. The composition of international capital flows has shifted from short-term bank loans and portfolio investments to longer-term engagements in the form of foreign direct investments and securities, which reduces the risk of a large, sudden reversal of capital flows. However, capital flows continue to be affected by business cycles and by changing business strategies, which implies that a certain degree of variability is unavoidable and indeed necessary. The current wave of mergers and acquisitions is likely to run out of steam in the future, even if developments in the first half of 2000 indicate a further rise in the volume of announced mergers and acquisitions. This development is bound to lead to a further sharp rise in global FDI flows in 2000.

The increasing number and size of cross-border mergers raises concerns about whether national competition authorities can maintain competitive markets in all sectors of their economies. The present situation, with ad hoc cooperation amongst national and regional authorities, has its limitations. This has led to a growing debate over whether more formal permanent cooperation – and/or a multilateral agreement – could deal better with these issues in the future. More generally, government policies in both developed and developing countries that favour deregulation, privatization of public enterprises and liberalization of investment regimes have supported the boom of FDI flows in recent years.

The strong net capital outflows from the euro area to North America contributed to the weakness of the euro *vis-à-vis* the US dollar. While this development provides support for European exporters and domestic producers competing with imports, it also fuels import prices and contributes eventually to rising consumer prices. Despite very low interest rates in Japan and a large capital outflow, the high level of savings combined with low investment expenditure has caused the yen to appreciate steadily in 1999 and in the first half of 2000.

Prices of international traded goods differed significantly by major product groups. While prices of agricultural products and manufactured goods recorded a further decline in 1999, the prices of fuels recovered partially from their steep fall in 1998. Exchange rate developments, in particular the weakness of the euro *vis-à-vis* the dollar, contributed to the dollar price decline of manufactured and agricultural products.

Goods traded within Western Europe are largely priced in euro or other European currencies and their prices are not changed in the short run if the European currencies change in their dollar value. In 1999, the dollar appreciated *vis-à-vis* the euro and other European currencies which meant that roughly stable prices in euro terms for intra-West European trade declined once in dollar terms. As Western Europe's intra-trade accounts for 30% of world trade, these price changes have repercussions at the global level.

The impact of trade policy on annual changes in trade flows is usually difficult to evaluate. In the case of multilateral or regional trade liberalization, the reduction of tariffs and non-tariff barriers is typically phased in over a number of years. This results in a modest impact in a given year, often dwarfed by other factors such as the business cycle or exchange rate variations. Beginning in 1999, the bulk of the Uruguay Round tariff cuts have been completed in the developed countries – with some exceptions – notably in textiles and agriculture. Consequently, the customs duty collected on imports has

decreased between 1994 and 1999 by 10% to US\$39.4 billion for the United States, the EU (15) and Japan, which combined account for nearly one half of world imports. As their imports increased over the same period by 40%, the ratio of collected duties to imports has decreased by about one third. These reductions closely match those calculated for the bound MFN tariffs agreed in the Uruguay Round. In 1999, the ratio of duties collected to imports ranged from 2.5% for the US (excluding imports from NAFTA partners), over 2.3% in Japan and to 1.7% for the EU (excluding intra-EU imports).

Trade flows of regional integration agreements (RIAs) evolved quite differently in 1999. While NAFTA intra-trade expanded by 11% – in line with the increase in overall imports – its exports to all other regions decreased slightly. The recession in MERCOSUR countries led to a contraction of intra-trade by one quarter while exports to regions outside Latin America stagnated. EU intra-trade lagged behind extra-imports but exceeded extra-regional exports. Among the four major RIAs, only the ASEAN grouping recorded an expansion of intra-trade which exceeded somewhat the growth of extra-regional exports and imports.

## 2. Trade developments in the first half of 2000 and outlook

Economic activity in the first half of 2000 picked up more strongly than most forecasters had projected at the beginning of the year. Recent IMF projections point to global GDP growth of 4.5% for 2000,<sup>2</sup> 1 percentage point more than the preceding year. Stronger demand has already resulted in more dynamic trade growth.

Data available for the first six months of 2000 indicate that the value of world merchandise trade grew by 14% or four times faster than in 1999. Oil exporting countries achieved above average growth due to the continued rise of oil prices which started to exceed US\$30 per barrel on the spot markets in the second quarter. Asia's imports and exports rose by about one quarter. China's trade expanded by more than one third. In the first six months of 2000, imports of the five Asian developing countries most affected by the 1997/1998 financial crisis again exceeded their pre-crisis level. US imports rose by 21% while exports increased by 14%, contributing to a new record current account deficit of US\$400 billion equivalent to 4.5% of GDP. Western Europe's exports and imports in dollar terms rose by 4 and 6% respectively. Latin America's imports recovered and exports rose by about 20%.

Price developments by major product groups differed dramatically in the first half of 2000. While oil prices surged by 90%, non-fuel commodity prices recovered by 5%, those of manufactures remained almost unchanged on a year-to-year basis. A major element in the stability of dollar prices for manufactured goods is the weakness of the euro *vis-à-vis* the US dollar.

The volume of world merchandise trade rose by about 12%. On the assumption that real trade growth is losing some of its steam in the second half but is still growing on a seasonally adjusted basis, the real growth of world merchandise exports should exceed some 10% and thereby match the best annual

1. Information on international capital flows is taken from IMF, *International Capital Markets*, September 2000.

2. Measured with weights using purchasing power parities. Using weights based on market exchange rates – a method retained in WTO statistics – the projected growth for 2000 is 4.1% (see IMF, WEO Sept. 2000, Annex Table 1).

trade growth in the 1990s. For 2001 a deceleration of world trade to 7% is expected.

### 3. Global trade and output developments

The acceleration in the growth of both global GDP and merchandise production to 2.5% in 1999 was accompanied by an expansion in merchandise trade of 5%, which was unchanged from the preceding year. Trade in manufactures rose 6% – significantly faster than trade in agricultural products. For both product groups the expansion in 1999 was somewhat faster than in 1998. Exports of mining products, however, dropped by 4.5% in real terms, the first such decline since 1985. Mining output decreased 2% due to lower oil and coal production. This shows a rather unusual development in an otherwise expanding economy. The source of these developments can be found in the oil industry, by far the largest segment of the mining sector. As prices of crude oil fell to a low of nearly US\$10 per barrel in the first quarter of 1999, OPEC and other oil producing countries agreed to cut back on oil output. OPEC countries reduced their output by about 4% in 1999, which was a marked departure from the steady expansion of their output during the previous ten years. OECD countries also met still rising oil demand by a marked run down of stocks.

The volume of exports of agricultural products (including processed food) in 1999 benefitted from above average growth in Western Europe and the return to positive growth in North American and Asian shipments. Agricultural production rose by 1.5%, somewhat faster than in the preceding year but still less than over the 1990-99 period.

As might be expected, world trade in manufactures in 1999 diverged across regions. While the exports of manufactures from Latin America, Asia and North America expanded above the global average in 1999, those of Western Europe grew less than in the preceding year and less than the world average. Manufacturing production is estimated to have risen by 3.5%, which is somewhat faster than in 1998 and throughout the 1990s when output rose by about 2% annually.

In 1999 trade growth across all major product groups remained below the average rate for the 1990-1999 period. The differences were particularly stark for agricultural products and, above all, mining products. The latter group expanded by 4.5%

annually in the 1990s but dropped by about the same amount in 1999.

A comparison of trade and output growth by sector shows that the historically large gap between the two rates observed in the 1990s narrowed considerably in 1999 for agricultural products and manufactures and was even reversed for mining products. Consequently, 1999 witnessed the smallest excess of total merchandise trade over output growth in the 1990s. Whether this is only an exceptional development linked to the gyrations of the energy markets or a more general feature of the world economy remains to be seen. The indications available for the first half of 2000 with very strong trade growth, however, suggest that it was largely a temporary phenomenon (see Table I.1).

### 4. Merchandise trade by product

The pattern of merchandise trade growth by product group was broadly similar to that experienced over the 1990s with the notable exception of fuels. All primary product groups, and iron and steel saw their share in world trade decline steadily in the 1990s and a decrease in their value in 1999. Despite the marked increase in the export value of fuels, the share of this product group in world trade was only 7.3% in 1999 – still three percentage points below its share in 1990. The product groups which recorded the largest gains in market share throughout the 1990s were office and telecom equipment, chemicals and automotive products which also recorded above average growth in 1999.

Primarily due to weaker prices, the value of food and agricultural raw materials decreased for the third year in a row. Food exports declined by almost 4%, which was one of the strongest decreases among all product groups. With the exception of Australia and New Zealand, all major exporting regions experienced a decline in their agricultural exports. Latin America and Africa, home of many developing countries exporting primarily agricultural products, recorded the strongest export decreases.<sup>3</sup> Although highly sensitive to cyclical variations in global demand growth, the world export values for non-ferrous metals, ores and minerals and iron and steel decreased further in 1999. This was despite the acceleration of global economic activity over the course of 1999. Again weaker prices for these products played a major role in these developments. This was especially true in the case of iron and steel which saw global exports drop by 11% in 1999, the strongest decrease of all 14 product categories distinguished in this report. The steepest export and import declines in this product group were recorded for Latin America and the transition economies.

In 1999, world exports of textiles continued to decrease while global trade in clothing increased by about one-and-a-half per cent. In fact, throughout the 1990s the share of textiles in world export levels tended to decline, reaching a record low of 2.7% last year. In contrast, the share of clothing exports remained between 3 to 3.5%. The 1990s also saw a major shift among the leading suppliers in terms of shares of world textiles trade. Western Europe, which accounted for more than one half of world textiles exports in 1990, saw its share falling by 10 percentage points to 43%, while Asia's share advanced by 6

**Chart 2**  
**World merchandise trade and output growth by major product group, 1999**  
(Annual percentage change in volume terms)

Source: Table I.1

3. From the 33 countries for which exports of agricultural products account for more than one half of their total merchandise exports, 28 are found in Latin America and Africa. Developing countries' agricultural exports contain a relatively high share of primary agricultural products – a product segment in which international trade expanded far less rapidly in the 1990s than for value added agricultural products.

Chart 3

## World merchandise trade by product, 1999

(Annual percentage change in value terms)

Source: Table IV.1

percentage points, nearly matching the share of Western Europe in 1999. Smaller gains in market share could be observed for North America and Latin America, in particular in the 1995-1999 period.

Western Europe, North America and Japan together accounted for more than four fifths of world clothing imports in 1999. Import growth among these three leading importers differed widely. Japan's imports recovered by 11%, while North America's slowed down sharply from the double digit growth recorded in the two preceding years. Western Europe's imports continued to decline moderately, partly due to the weakness of the euro *vis-à-vis* the US dollar. Since 1995, North America's share in world clothing imports has increased from one quarter to more than 30% in 1999, while Western Europe and Japan's share decreased by 3.5 and 2.5 percentage points respectively. Clothing exports from the Asian region recovered by 2.5% due to the strength of shipments to Japan and Western Europe. Although Asia remains the world's largest supplier of clothing, with a 43% share in 1999, this is well below its peak level of 48% reached in 1993, and has remained rather stable over the last four years. The most dynamic region in terms of clothing exports throughout the 1990-1999 period was Latin America. By expanding its shipments annually by 20%, the region has nearly tripled its share in world exports to 10.3% in 1999. Throughout the 1990s Latin American exporters gained considerable market shares in the US primarily at the expense of Hong Kong, China; the Republic of Korea and Chinese Taipei. In 1999, however, the slowdown in North America also contributed to a marked deceleration for Latin America's clothing exports as the region takes more than 90% of Latin America's clothing exports.

Although the transition economies' clothing exports decreased in 1999, overall their shipments expanded throughout the 1990s at twice the pace of global clothing trade. Like Latin America, shipments from transition economies are highly concentrated on one major market, Western Europe, which alone takes nearly 90% of its total clothing exports. The outstanding expansion and high regional concentration of clothing exports of Latin America and the transition economies must be partly attributable to preferences given in various regional integration arrangements, which link these regions closely to the North American and Western European markets (see Tables IV.75-82).

Among manufactures, exports of automotive products and office and telecom equipment recorded the strongest growth in 1999, at 5.5 and 10%, respectively. As the registrations of new

automobiles recovered, production and trade expanded strongly. However, large regional differences in demand prevailed, which in some cases were accentuated by exchange rate developments. North America's imports of automotive products surged by 18% while its exports, largely concentrated on NAFTA countries, increased by 12%.

The importance of the North American market for global trade in automotive products is highlighted by the fact that the size of its imports increased by US\$31 billion in 1999 – a figure which exceeded the rise in total world trade in automotive products.

While North America is the world's largest net importer and Asia the largest net exporter of automotive products, Western Europe remains the largest exporting and importing region with the balance tipped slightly towards exports. As intra-West European trade accounts for about four fifths of Western Europe's exports of automotive products, the marked slowdown from double-digit growth in 1998 to near stagnation in 1999 led to a modest overall increase in the region's trade. The most dynamic exporters of automobiles have not been the large traditional producers, but rather Mexico, the Republic of Korea, Brazil and Central/Eastern Europe, which expanded their exports at double digit rates throughout the 1990s (see Tables IV.59 – IV.66).

World trade in office and telecom equipment was stimulated by strong demand growth for computers, semi-conductors and mobile phones. It has been estimated that the dollar value of world exports in mobile phones rose by one quarter, that of semiconductors by nearly 15% and that of computers (including parts) by somewhat less than 10%. In many respects office and telecom equipment comprises the hardware component of today's revolution in information technology. Trade in this product category has been growing more than two times faster than total trade, not only in 1999, but also throughout the 1990s.

Asia, which accounts for nearly one half of world exports of office and telecom equipment, contributed most to the return to higher growth as both exports and imports expanded by about 15% – considerably faster than the trade of other regions.

Developing countries in Asia have a unique role in the world supply of office and telecom products as they account not only for more than one third of world exports, but also for one quarter of world imports due to their extensive intra-industry exchanges. North America also accounted for one quarter of world imports – and grew only slightly faster than world trade as a whole. In contrast to Asia and North America, Western Europe is the largest importer of office and telecom equipment and recorded a sharp deceleration of its export and import growth to about 3 to 5% in 1999 (see Tables IV.51 – IV.58).

Trade in fuels rose by 19% to US\$400 billion in 1999, recovering about one half of the losses recorded in the preceding year. The increase in fuel exports was equivalent to about one third of global nominal trade growth. Oil prices increased by more than one third in 1999 without fully recovering from their decline in preceding years. World export prices of fuels increased considerably less than crude oil prices on spot markets. Crude oil imported under long-term contracts, oil products and natural gas recorded less price pressure and dampened the overall fuel price increase in 1999. Of the nearly 25 countries for which fuel accounts for one half or more of their total export earnings, 10 are situated in the Middle East. The Middle East is not only the region with the highest share of fuels in its exports, but also by far the largest fuel exporter, accounting for nearly 30% of world fuel exports. Middle East fuel exports rose by nearly one third in 1999. African fuel exports increased by one fifth, but their value remained below the peak of 1997. Among the other regional net exporters of fuels, Latin America's exports rose well above the global average, while the transition economies as a group

recorded only a 10% increase largely due to the further contraction of the region's intra-trade. Looking at world trade in fuels in the 1990s, one notices that the shares of regions in world fuel exports have changed only marginally. On the import side, however, significant changes have occurred. The share of Western Europe and Japan in world fuel imports decreased by 7.5 and 3 percentage points respectively, while developing Asia and Latin America increased their shares by 7 and 1 percentage points respectively. The higher share of these two regions also reflects their above average economic growth in the 1990s. Despite the increased weight of developing countries in world fuel imports, the combined share of North America, Western Europe and Japan in world imports amounted to close two thirds in 1999 (see Tables IV.20 – IV.24).

## 5. Commercial services trade in 1999

World exports of commercial services rose by 1.5% to US\$1350 billion in 1999. As in the preceding year, the overall modest trade expansion conceals rather large regional year-to-year variations. North America and Asia recorded a stronger performance in 1999 over the previous year, while Eastern Europe, the transition economies and Latin America were much weaker.

Particularly strong export and import growth in commercial services was achieved in the United States and the Asian developing countries. In the case of North America, it was transportation services which, linked to the booming merchandise trade, recorded untypically the strongest growth among the three major services categories. In Asia, travel services exports and imports both recovered by about 9% after a double digit decline in 1998. The weaker performance of Western Europe's commercial services trade could be observed in all three product categories, but was most pronounced in the residual group "Other commercial services". Latin America's contraction of commercial services imports was most pronounced for travel services, which decreased by 11%. However, on the export side, travel services still recorded a modest increase indicating that the contraction of intra-regional travel could be offset by an increase of travel receipts from tourists outside the region.

Africa's commercial services exports are estimated to have expanded by 8.5% in 1999, the strongest increase among all

regions. The recovery in Africa's exports can be largely attributed to the rebound of Egypt's tourist earnings which lifted Egypt's exports of commercial services by 18%. However, Africa's exports, excluding Egypt, still increased by about 4%, faster than the global average.

The transition economies form the only region which recorded a sharp contraction in both exports and imports. The shrinking of Russia's exports and imports by about one quarter has been the major element in this development.

While large differences could be observed in the year-to-year variations of commercial services trade by region for the world as a whole, the differences across major product categories remained in a rather narrow range of an average of 1.5%. Throughout the 1990s, global transportation and travel services receipts expanded by 3.5 and 6% annually, markedly less than those of "Other commercial services", which rose to 8.5%. However, in 1999 trade in "Other commercial services" expanded only at the average rate. The less dynamic growth in this product category could be observed across all major regions and is the principal reason why total commercial services trade expanded less rapidly than merchandise trade in 1999 for the first time since 1995.<sup>4</sup> The principal factor behind the lacklustre growth of this service category would appear to be the decline in construction services as well as a marked deceleration in the growth of royalties and license fees.

## 6. Trade by region

**North America** continued to be the major motor of global trade expansion in 1999. With a share of slightly more than one fifth of world imports, its increase in merchandise imports of US\$128 billion and of commercial services imports of nearly US\$16 billion accounted for more than one half of the expansion of both world merchandise and commercial services trade. The strength of US domestic demand, combined with the high value of the dollar, pushed the United States' share of world merchandise imports to 18%, a level never before reached in history.

For the third year in a row, North America's GDP growth exceeded 4%, contributing to an inflation adjusted import rise of more than 10% annually. Real merchandise export growth accelerated somewhat but remained at nearly 6%, about half the rate recorded for imports. Again for the third year in a row, the value of North America's commercial services imports rose faster than commercial services exports. The region's economic performance is largely determined by the growth patterns of the US economy which is marked by an even larger divergence between export and import growth than the regional aggregate. As a result of these developments, the US merchandise trade deficit continued to widen, the surplus in commercial services trade eroded and the US current account deficit amounted to 3.7% of GDP exceeding the 1987 peak. Although Canada's GDP growth matched that of the US in 1999, its domestic demand growth was markedly lower than that of the US, which is one factor explaining why merchandise exports and imports both expanded by 10.5% in real terms. Another major factor in the strength of Canada's exports has been the rise by one quarter in the value of shipments of automotive products to the United States. Favourable price trends also contributed to the fact that

Chart 4

(Annual percentage change in value terms)

Source: Table I.4

4. The statistical data in respect to the category "Other commercial services" seem to be in general of a weaker quality than that of transportation and travel services. The former group is subject to more frequent changes in methods and revisions at the national level and its year-to-year developments have apparently a much weaker link to business cycles than transportation and travel.

Table 1

**GDP and trade developments in North America, 1990-99**

(Annual percentage change)

	North America			United States			Canada		
	1990-99	1998	1999	1990-99	1998	1999	1990-99	1998	1999

the value growth of exports exceeded that for imports for both merchandise and commercial services trade.

An analysis of North America's merchandise exports by major destinations reflects the large differences in other regions' import demand growth and, in most cases, a loss of market share for North American products. Intra-North American trade – which accounts for nearly 40% of North America's exports – rose by 10%, slightly less than the region's imports. Exports to Asia – which account for slightly more than one fifth of total exports – rose by 3%, while Asia's imports recovered by 10%. North America's exports to Western Europe rose by nearly 3%, somewhat faster than Western Europe's total imports. A marked fall in US food exports (-US\$2.4 billion) was more than offset by strong growth in shipments of US aircraft (+ US\$3 billion), office and telecom equipment (+ US\$1.5 billion) and Canadian fuel exports (+ US\$2 billion). North American exports to Latin America (excluding Mexico), the Middle East, Africa and the transition countries declined by between 10 and 25% (see Table III.10).

North American imports from Asia, Western Europe and Latin America (excluding Mexico), rose by about 10% – at the same rate as intra-North American trade. Above average growth was recorded for shipments from Mexico and the Middle East. Imports from Africa and the transition economies rose by 5-6% – or only half the rate of total imports.

The major changes in the origin of North American imports between 1990 and 1999 are to be found not at the regional but at the country level. While China increased its share of North American imports by 4.5 percentage points to 7.4%, Japan's share decreased by 5%. The share of the four high-income developing Asian economies (Hong Kong, China; the Republic of Korea; Singapore and Chinese Taipei) also fell by 2.5 percentage points. On balance, Asia's share remained unchanged at 34.5%. Mexico's share in North American imports increased to 9.2% in 1999 – an increase of 4 percentage points since 1990. The share of all the other Latin American countries combined declined by 1% (see Table III.11).

The main feature of the structural change in North American exports in the 1990s is the increased prominence of intra-North American trade – especially exports to Mexico. While the exports to NAFTA countries accounted for nearly 50% of the region's exports – an increase of 9 percentage points since 1990 – exports to Western Europe and Asia experienced a corresponding decline. This major change occurred as exports to NAFTA countries rose by nearly 10% annually, or twice the growth rate of exports to Asia and Western Europe.

Latin America's GDP, which expanded by 3.5% between 1990 and 1997, slowed down in 1998 and stagnated in 1999. Imports of merchandise and commercial services declined for the first time in the 1990s, contrasting sharply with the very dynamic growth throughout the 1990-98 period. The average growth of Latin American trade and output growth masks the very different experience of the region's leading trader, Mexico, and the other Latin American countries. Mexico, which accounts for about 45% of the region's total merchandise trade, recorded double digit merchandise export and import growth in 1999, while all other Latin American countries reported a steep fall in their imports and a stagnation in the value of their exports. The principal explanation for this divergent picture can be found in Mexico's high integration with the North American trading system, while other Latin American countries depend much more on intra-regional trade, which has been shrinking.

Latin America's merchandise trade is highly concentrated among a few countries. Mexico and Brazil alone account for 60% of the region's merchandise trade, and the top five traders account for more than three quarters of the region's merchandise exports and imports.

Chart 5 ranks the Latin American countries according to their overall merchandise trade value in 1999. It shows that merchandise trade often plays a more important role for smaller economies than for larger ones, if measured by the value of per capita trade. The per capita trade values by country in 1999 also reveal the large differences between countries, and indicate the importance of trade to economies with small populations.

The annual variation in merchandise exports in 1999 reflects the above average growth of the oil exporting countries (e.g. Venezuela, Netherlands Antilles and Bahamas) and the above average decline of the MERCOSUR countries. The outstanding growth of Costa Rican exports is linked to the sharp rise in shipments from a new micro-processor plant, lifting the share of office and telecom equipment in Costa Rica's exports to nearly 40%. As regards export developments in 1990-99, the oil exporting countries report below average growth, while Mexico, the Dominican Republic, Costa Rica, El Salvador and Panama report average annual growth rates ranging from 10 to 18%.

The gravity of the recession in Central and South America found its repercussions in a marked import contraction among 15 countries. Despite the widespread recession in the region, 8 countries expanded their imports by more than 10%. The countries which recorded high import and export growth were the Dominican Republic, Costa Rica, El Salvador and Panama.

Exports (real)	8.5	7.5	7.5	14.0	11.0	13.5	5.5	5.5	3.0
Imports (real)	10.5	8.5	-1.0	12.5	16.0	15.5	9.0	4.5	-11.0
Commercial services									
Exports (nominal)	6.5	7.0	-0.5	5.5	6.5	-1.0	7.0	7.0	0.0
Imports (nominal)	6.5	4.5	-6.5	3.5	7.0	9.5	8.0	4.0	-10.0

This was largely due to their extensive processing trade with the United States. Taking a mid-term view, the expansion of imports between 1990 and 1999 exceeded the global average rate of 6% for two thirds of Latin American countries. There are only two countries in Latin America whose import and export value in 1999 was below the 1990 level. In the case of Cuba, the decline of its merchandise trade was largely concentrated in the 1990-92 period and is linked to the break up of its previously close trade ties with the former centrally-planned economies in Europe. In the second half of the 1990s, Cuba's imports of merchandise expanded rapidly while exports stagnated.

Latin America's commercial services exports and imports are less concentrated among a few major traders than is the case for merchandise trade although the three leading traders remain Mexico, Brazil and Argentina. The most dynamic exporters of commercial services are not the large economies of the region, but the Dominican Republic and Cuba, which report double digit export growth not only in 1999 but throughout the 1990-99 period. This is due to their booming tourism industry.

The decline in Mexico's exports of commercial services in 1999 can be partly attributed to the marked fall in tourist earnings, which still accounted for two thirds of Mexico's services exports. Mexico's commercial services imports rose by 9%, while for other Latin American countries commercial services imports

decreased by 10% on average. The largest decline is reported by Brazil (less 24%) and Ecuador (less 16%). The developments in 1999 differ from trends observed over the 1990s in so far as Mexico's average annual import growth of 4% was much smaller than the average growth of the other Latin American countries which rose by 8% – even faster than world trade in commercial services (see Table III.28).

The slowdown of **Western Europe's** trade in 1999 has to be seen in conjunction with the region's weakening GDP growth. Exports and imports of merchandise and commercial services stagnated in nominal dollar terms.<sup>5</sup> Adjusted for the deflation in dollar terms, merchandise exports and imports expanded by nearly 4% in real terms. The impact of the US dollar rise *vis-à-vis* West European currencies had a larger impact on nominal trade flows in dollar terms than the deceleration in volumes. Western Europe's exports by product groups show declines across all categories except fuels, office and telecom equipment, chemicals and automotive products. While the value decline for most other product groups ranged between 2 and 4%, textiles and iron and steel products recorded above average decreases. The decline in

5. If measured in euro terms, Western Europe's exports of merchandise and commercial services rose by 4.6 and 4.2 %, respectively, in 1999.

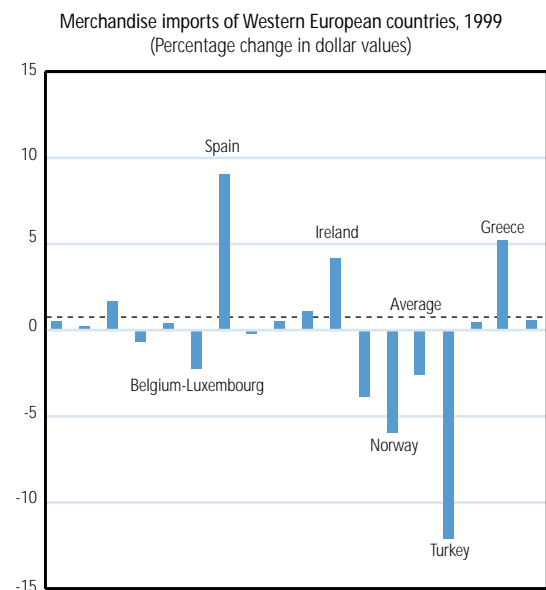

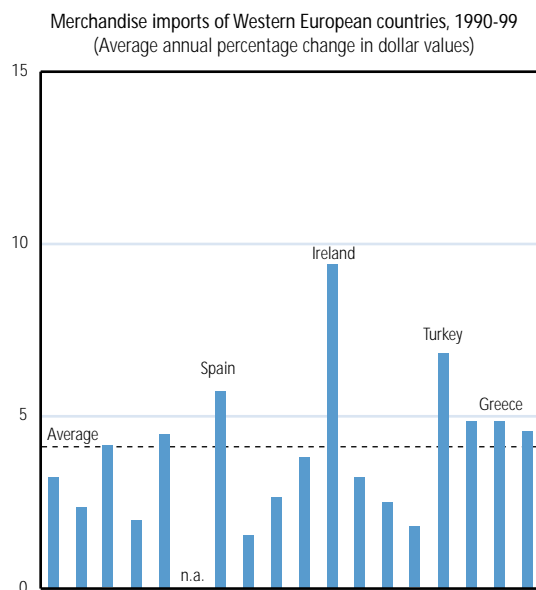

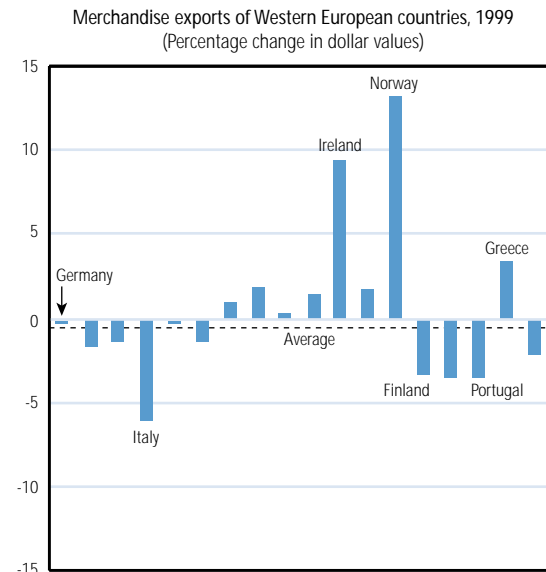

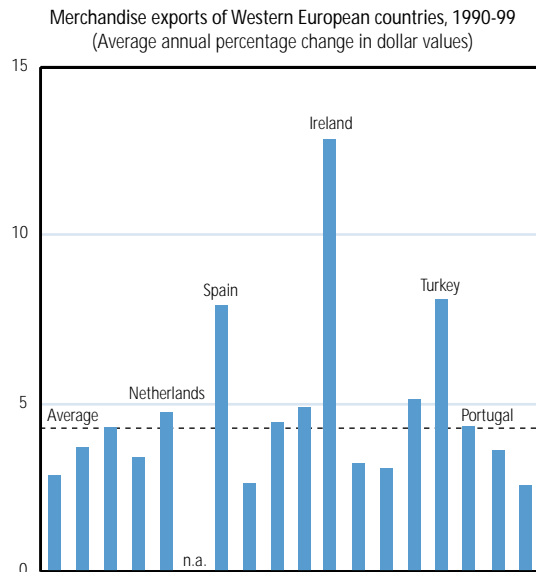

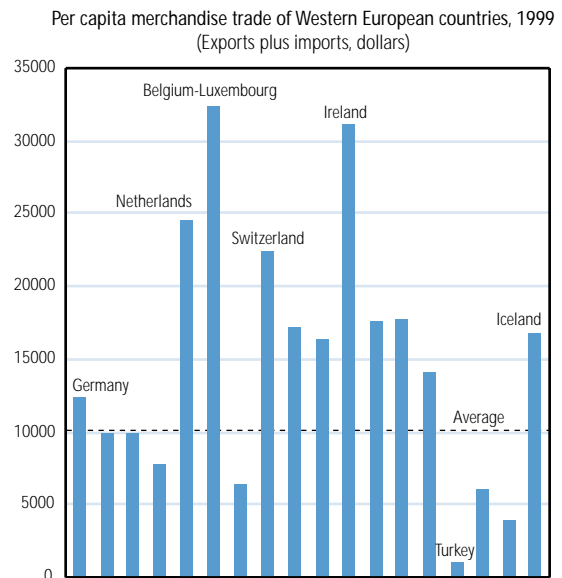

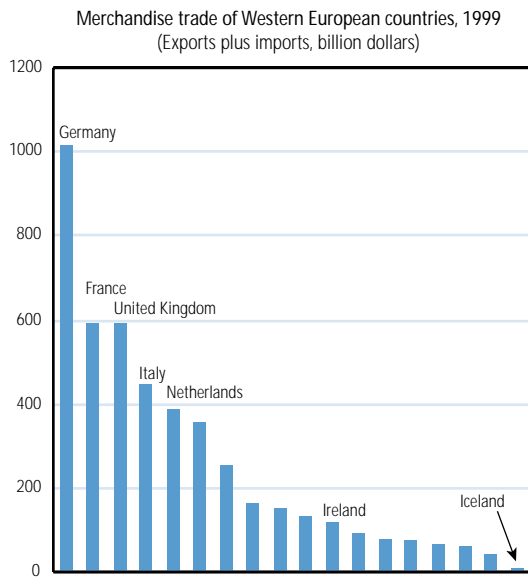

Table 3

Western Europe. Merchandise trade by country, 1990-99

imports followed a similar pattern in that the highest and lowest growth rates are reported across the same product categories. The product groups with the most dynamic growth in 1999 – office and telecom equipment and automotive products – also recorded above average growth throughout the 1990s with the noticeable exception of fuels (see Tables III.31 and III.32).

Western Europe's export growth by destination differed across regions. While intra-West European trade stagnated, shipments to North America rose by 11.5%. Exports to the transition economies fell by nearly 10%, and to Latin America, Africa and the Middle East by about 6 to 7%. The recovery in Western Europe's exports to Asia remained moderate at 2%. The double digit growth of shipments to Japan and China was offset by a further contraction of shipments to other Asian developing countries. The products which contributed most to the double digit growth of exports to North America and Japan were above all chemicals and automotive products (see Appendix Table A7).

Western Europe's exports of commercial services decreased slightly in 1999 as transportation receipts fell by about 2.5%. Travel receipts stagnated, and receipts from "Other commercial services" grew by a modest 1%. Due to the importance of intra-regional trade, the sectoral growth pattern of commercial services imports was rather similar to that of exports. One of the outstanding developments in Western Europe's commercial services trade was the sharp deceleration in "Other commercial services" trade, which might be partly attributed to a change in the recording methods of some countries.

Western Europe's merchandise trade by country in 1999 and 1990-1999 is reported in Chart 6. Norway and Ireland recorded the fastest export growth in 1999, thanks to the importance of fuels and office and telecom equipment in their export baskets. Spain, Ireland and Greece recorded the strongest import growth. On the other hand, Turkey's imports fell by 12% as its economy contracted under the repercussions of a major earthquake.

In the 1990-1999 period, Ireland, Spain and Turkey achieved by far the highest growth for merchandise exports and imports among the West European countries. Three of the four largest West European traders, (e.g. France, Germany and Italy) recorded export and import growth below the European average.

The **transition economies** grew by nearly 2% in 1999, yet real exports are estimated to have decreased by 1.5% and real imports by nearly 9%. These developments contrast with the preceding years (1995-1998) when trade expanded strongly at a time when output growth was on average slightly negative. This

seemingly anomalous trend can be attributed largely to developments in Russia which led to a steep fall of intra-trade among transition economies. Efforts by the Central/Eastern European countries to limit their current account deficits in the wake of overall stagnating merchandise exports resulted in a moderate import reduction.

Following Russia's financial crisis, the steep devaluation of the rouble, and a contraction of output in 1998, the Russian economy recovered in 1999 by about 3%. Under the impact of the devaluation, merchandise imports plunged by a further 30%. Domestic producers regained competitiveness, maintained their export level and increased their market shares at home. The contraction of Russia's imports translated into a fall of exports for those economies for which Russia was a principal export market (e.g. Belarus, Moldavia and Lithuania).

Moderate GDP growth for the group of Central/East European countries, together with the deceleration in West European import growth and stagnating net capital inflows, led to a marked slow down in trade growth, particularly for imports. The importance of Western Europe in the trade of Central/East European countries has risen steadily over the last years. In 1999, Western Europe was the destination for three quarters of Central/East European merchandise exports. Western Europe also provided two thirds of merchandise imports for these countries (see Tables III.48 and III.49). The product composition of merchandise exports has changed markedly. Exports of manufactured goods account now for more than 80% of total exports due to the very marked increase of the share of automotive products and office and telecom equipment.

A summary review of merchandise trade of all the transition economies provided in Chart 7 shows that 17 out of 21 transition economies recorded a decrease of their imports in 1999. In 12 cases, the decrease ranges between 10 and 45%. For merchandise exports, the number of economies with increasing exports in 1999 nearly matches those with decreasing exports. Some of the smaller traders report even exceptionally strong growth, linked to the marked rise in their crude oil and natural gas production. For 1999, one third of the transition countries report a lower export and import value than for 1995, underscoring the numerous difficulties these countries face in their efforts to participate in the expansion of world trade. Over the same period, four countries – Hungary, Estonia, Azerbaijan and Georgia – recorded an expansion of exports and imports of over 10% annually.

**Africa's** economic expansion continued at about 3% in 1999, unchanged from the rate in the two preceding years, and hardly above the region's population growth. Merchandise exports recovered strongly in both nominal and real terms. Merchandise imports, however, stagnated as the further strong decrease in South Africa's imports was balanced principally by higher imports among the oil-exporting countries. For commercial services, the available data also points to a sharp increase in exports and a moderate decline in imports. The strength of Africa's commercial services exports can be attributed to the dynamic growth of travel receipts in four countries, Egypt, Morocco, Tunisia and Mauritius. Africa's total travel receipts are estimated to have recovered by 16%, reaching a new peak of US\$14 billion.

Africa's merchandise trade developments are still strongly affected by commodity price developments. While the recovery of fuel prices boosted the earnings of the fuel exporting countries by about one quarter, the further double digit decline of non-fuel commodities prices in 1999 led to another decrease in Africa's exports in agricultural products. Africa's exports of manufactured goods, however, expanded strongly, in particular chemicals and other semi-manufactures.

About one half of Africa's merchandise exports are destined to Western Europe, a share which was somewhat less than at the beginning of the decade. EU imports from Africa recovered by 6% in 1999, due largely to the double digit growth of fuels imports. Despite this recovery, EU fuels imports from Africa were still well below their 1990 level. Imports of manufactures and agricultural products, however, rose by an average of 6 and 2% respectively over the 1990-1999 period. Among manufactured goods, clothing imports rose by 8% annually, amounting to US\$6.8 billion or 11% of total imports from Africa in 1999.

Asia gained in importance as an export destination for African exports, largely due to Asian developing countries' growing demand for African mining products and, in particular, fuels. North America's share of Africa's exports roughly equalled Asia's share – at some 15% each – in 1999. These shares were unchanged from 1990. Intra-African trade accounts for nearly 10% of Africa's merchandise exports in 1999.

A comparison of the merchandise trade developments of 40 African countries in 1999 against the period 1990-99 is shown in Chart 8. Their merchandise trade value in 1999 ranges from more than US\$50 billion (South Africa) to less than US\$500 million (Rwanda). The top five African traders account for more than one half of Africa's total merchandise trade. Africa's trade per capita was about US\$300. Three countries – Botswana, Gabon and Mauritius – report per capita trade of about

US\$3000, but for more than 20 countries per capita trade is below the regional average.

Export and import growth in 1999 showed large variations from country to country. Seven fuel exporting countries reported double digit growth in exports for 1999 – in contrast to the period 1990-1999 when the majority of these same countries reported falling or stagnating exports. Among the 12 African countries which reported a drop in their export earnings in 1999, Burkina Faso, Cameroon, Ethiopia and Malawi experienced the sharpest contractions, ranging from 15 to 30%. About one quarter of the African countries in our sample reported export growth at or above the global average for the 1990-99 period.<sup>6</sup> Although the differences in import growth rates among the African countries are less pronounced than for exports, they remain very large. The imports of 13 African countries decreased, while 8 other African countries recorded import growth of above 10% in 1999.

Due to the oil price developments, the **Middle East's** exports recovered to US\$170 billion in 1999, which was still below the 1997 level. Iraq and Yemen recorded outstanding increases while non-fuel exporters, Lebanon, Jordan and Cyprus reported a modest increase or even a decline in their merchandise export value. Israel's exports rose by 12%, benefitting from the strong expansion of international demand for office and telecom equipment, which accounted for nearly one fifth of Israel's merchandise export revenues. The region's merchandise imports increased by 3% to US\$150 billion. Eight countries saw imports fall, while Iraq, Israel, Qatar and Yemen recorded double digit import growth.

Developments by country in 1999 differ significantly from trends throughout the 1990-1999 period. Despite their strong export recovery, the value of exports from Iran and Iraq in 1999 was still below 1990 levels, while Israel and Jordan's exports rose by 9 and 6% annually (see Table III.64).

Chart 9 also shows per capita merchandise trade by country. It reveals the large differences that prevail among Middle East economies. Merchandise exports and imports per capita in four of the five economies with populations exceeding 15 million range between US\$300 and US\$700, while in seven economies with smaller populations per capita trade ranges between US\$5000 and US\$20000.

In the aftermath of the financial crisis of 1997/1998, **Asia's** trade and output recovered strongly. The region's GDP growth matched the growth of the global economy as a whole, while Asia's merchandise and commercial services trade exceeded the

6. In some cases, the high average growth was achieved from exceptionally low levels in 1990.

Exports (nominal)	3	13	7	-3	5	5	5
Imports (nominal)	7	11	-4	2	4	4	4

world average. Large variations could be observed at the country level for both output and trade. The five Asian developing countries most affected by the crisis recorded a GDP growth of 6% – or about twice the global income growth. However, their return to positive growth was quite uneven as individual GDP growth rates ranged from Indonesia's near stagnation to the Republic of Korea's growth of above 10%. The region's largest economy, Japan, recorded sluggish growth. The most populous countries, China and India, achieved an outstandingly high GDP growth of about 6 to 7%.

Following the severe contraction of dollar trade values in 1998, Asia's merchandise and commercial services trade expanded dramatically in 1999 – once again exceeding the global average. The recovery of intra-regional trade, exchange rate developments, higher commodity prices and strong global demand for information technology products were the principal factors underpinning Asia's trade expansion in 1999. The rise in Asia's merchandise exports by 7.5% was boosted by double digit growth of intra-regional exports and a rise of 14% in the region's office and telecom equipment exports. Import growth exceeded export growth in both nominal and real terms. Although the five Asian countries most affected by the 1997/1998 crisis recorded an import surge of about 15%, this increase could not fully offset the steep fall in the preceding years. Japan's import rise in real terms was rather strong given the sluggish state of its economy.

Asia's commercial services exports rose by 3.5% to US\$264 billion in 1999. Travel and transportation receipts recovered by 9 and 6% respectively in conjunction with the region's trade and output recovery. However, other commercial services receipts, comprising communication, construction, financial services and royalties and licence fees, recorded a further decline in 1999. The decline across this product group was particularly marked in China, Chinese Taipei, Japan and the Philippines, and was not fully offset by gains from India and Singapore (see Table 1.7).

Data on Asia's merchandise trade by country are provided in Chart 10. The chart highlights the big variations in per capita trade values between high and middle income countries and low ones. While the former report per capita trade values of about US\$6000 and upwards, the latter group typically displays values well below US\$500.

Many Asian low income countries with a modest share in world trade achieved outstandingly high export growth in both 1999 and throughout the 1990/1999 period. Seven of these countries report export and import growth rates well above the Asian average rates. Export growth exceeding 10% annually can be found for Bangladesh, Cambodia, the Lao People's Democratic Republic, Myanmar, Nepal and Viet Nam. Among the leading traders in Asia, China expanded its merchandise trade at nearly twice the rate of Asia as a group in the 1990s, while Japan's trade growth lagged behind.

Imports (real)	7.0	-8.5	11.5	4.5	-5.5	9.5	7.0	-22.5	16.0
Commercial services									
Exports (nominal)	8.1	-14.8	3.4	4.3	-9.3	-2.4	10.5	-24.2	2.3
Imports (nominal)	7.3	-10.8	5.3	3.4	-9.3	3.1	10.7	-26.3	5.9

<sup>a</sup> The five countries most affected by the financial crisis in 1997/98 are Indonesia, Republic of Korea, Malaysia, Philippines and Thailand.

Chart 10

Asia. Merchandise trade by country, 1990-99

Merchandise trade of Asian countries, 1999  
(Exports plus imports, billion dollars)

Per capita merchandise trade of Asian countries, 1999  
(Exports plus imports, dollars)

Merchandise exports of Asian countries, 1990-99  
(Average annual percentage change in dollar values)

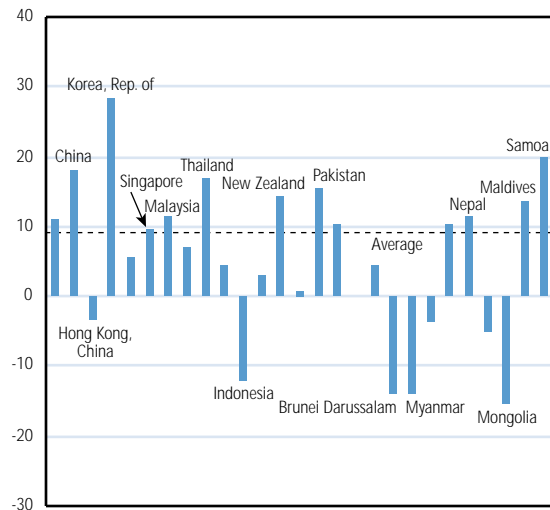

Merchandise exports of Asian countries, 1999  
(Percentage change in dollar values)

Merchandise imports of Asian countries, 1990-99  
(Average annual percentage change in dollar values)

Merchandise imports of Asian countries, 1999  
(Percentage change in dollar values)

# I. World trade in 1999 - Overview

Table I.1

## Growth in the volume of world merchandise exports and production by major product group, 1990-99

(Annual percentage change)

	1990-99	1996	1997	1998	1999
World merchandise exports	6.5	6.0	10.5	5.0	5.0
Agricultural products	4.0	4.0	5.5	1.0	2.5
Mining products	4.5	5.5	9.0	6.5	-4.5
Manufactures	7.0	6.0	11.5	5.5	6.0
World merchandise production	2.0	3.0	4.5	1.5	2.5
Agriculture	2.0	3.5	2.5	1.0	1.5
Mining	1.5	2.5	3.5	1.5	-2.0
Manufacturing	2.0	3.0	5.5	2.0	3.5
World GDP	2.0	3.0	3.5	2.0	2.5

Note: World merchandise production differs from world GDP in that it excludes services and construction.

Table I.2

## Growth in the volume of world merchandise trade by selected region, 1990-99

(Annual percentage change)

Exports				Imports		
1990-99	1998	1999		1990-99	1998	1999
6.5	5.0	5.0	World	6.5	4.5	6.0
7.0	3.5	6.0	North America <sup>a</sup>	8.5	10.5	11.0
8.5	7.5	7.5	Latin America	10.5	8.5	-1.0
6.0	6.0	4.0	Western Europe	5.5	8.0	4.0
6.0	6.5	3.5	European Union (15)	5.5	8.5	4.0
4.0	5.0	-1.5	C./E. Europe/Baltic States/CIS	3.0	4.5	-9.0
7.5	3.5	7.5	Asia	7.0	-8.5	11.5
2.5	-1.5	2.0	Japan	4.5	-5.5	9.5
10.0	5.0	9.0	Six East Asian traders	7.0	-14.5	14.0

<sup>a</sup> Excluding Mexico throughout this report.

Table I.3

**Growth in the value of world merchandise trade by region, 1999**

(Billion dollars and percentage)

Exports					Imports			
Value	Annual percentage change				Value	Annual percentage change		
1999	1990-99	1998	1999		1999	1990-99	1998	1999
5473	5	-2	3	World	5729	6	-1	4
934	7	-1	4	North America <sup>a</sup>	1280	8	5	11
297	8	-1	6	Latin America	335	11	5	-3
2353	4	4	0	Western Europe	2418	4	6	1
2180	4	4	-1	European Union (15)	2232	4	6	1
214	6	-5	-1	C./E. Europe/Baltic States/CIS	214	5	-2	-12
102	7	9	1	Central and Eastern Europe	131	10	11	-1
112	-	-14	-2	Baltic States and the CIS	83	-	-14	-24
112	1	-16	9	Africa	133	4	1	0
170	3	-23	24	Middle East	150	5	-3	3
1394	7	-6	8	Asia	1200	6	-18	10
419	4	-8	8	Japan	311	3	-17	11
195	14	0	6	China	166	13	-1	18
546	8	-7	8	Six East Asian traders	485	6	-25	11

a Excluding Mexico throughout this report.

Note: It should be mentioned at the outset that there are breaks in the continuity of the figures at the country and regional levels. These breaks are indicated in Appendix Tables A3 and A4. Explanations of significant breaks are given in the Technical Notes.

Table I.4

**Growth in the value of world trade in commercial services by selected region, 1999**

(Billion dollars and percentage)

Exports					Imports			
Value	Annual percentage change				Value	Annual percentage change		
1999	1990-99	1998	1999		1999	1990-99	1998	1999
1350	6	1	1	World	1345	6	2	2
288	7	3	6	North America <sup>a</sup>	219	6	6	8
53	7	7	0	Latin America	62	7	5	-6
640	5	7	-1	Western Europe	609	5	9	1
574	5	7	0	European Union (15)	561	5	9	0
29	5	-3	8	Africa	35	3	-1	-2
264	8	-15	3	Asia	336	7	-11	5
24	17	-3	-1	China	31	25	-5	16
60	4	-9	-2	Japan	114	3	-9	3
124	9	-18	7	Six East Asian traders	121	9	-13	7

a Excluding Mexico throughout this report.

Note: It should be mentioned at the outset that there are numerous breaks in the continuity of the figures at the country and regional levels due to frequent revisions to the trade in services data. See the Technical Notes.

Table I.5

## Leading exporters and importers in world merchandise trade, 1999

(Billion dollars and percentage)

Rank	Exporters	Value	Share	Annual percentage change	Rank	Importers	Value	Share	Annual percentage change

a Secretariat estimate.

Note: Figures for a number of countries and territories have been estimated by the Secretariat. Annual percentage changes and rankings are affected by continuity breaks in the series for a large number of economies, and by limitations in cross-country comparability. See the Technical Notes. For annual data 1989-99, see Appendix Tables A5 and A6.

Table I.8

## Share of goods and commercial services in the total trade of selected regions and economies, 1999

(Billion dollars and percentage, based on balance of payments data)

	Exports			Imports		
	Value	Share		Value	Share	
	Total	Goods	Commercial services	Total	Goods	Commercial services
World	6890	80.4	19.6	6870	80.4	19.6

<sup>a</sup> Trade in goods includes significant re-exports or imports for re-exports.

Note: Trade in goods is derived from balance of payments statistics and does not correspond to the merchandise trade statistics given elsewhere in this report. It is likely that for most economies trade in commercial services is understated. See the Technical Notes.

Table I.9

## Merchandise trade of selected regional integration arrangements, 1999

(Billion dollars and percentage)

	Value	Share in total exports/imports			Annual percentage change		
	1999	1990	1998	1999	1990-99	1998	1999

GATT/WTO Members <sup>b</sup>	52.9	66.0	74.2	89.1	83.9	91.0	91.6

a Figures are significantly affected by: (i) changes in the country composition of the region and major adjustment in trade conversion factors between 1983 and 1993; and (ii) the inclusion of the Baltic States and the CIS mutual trade between 1993 and 1999.

b Membership as of the year stated.

Note: Between 1973 and 1983 and between 1993 and 1999 export and import shares were significantly influenced by oil price developments.

## IV. Trade by sector

### 1. Overview

Chart IV.1

#### World merchandise exports by product, 1990 and 1999

(Share based on value)

a Excluding automotive products and office and telecom equipment (throughout this report they are included with machinery and transport equipment, unless otherwise noted).

Table IV.1

#### World merchandise exports by product, 1999

(Billion dollars and percentage)

	Value	Share		Annual percentage change			
	1999	1990	1999	1990-99	1997	1998	1999
All products a	5473	100.0	100.0	5	4	-2	3
Agricultural products	544	12.2	9.9	3	-1	-5	-3
Food	437	9.3	8.0	4	0	-3	-4
Raw materials	107	2.9	2.0	1	-2	-11	-1
Mining products	556	14.3	10.2	2	3	-21	12
Ores and other minerals	56	1.6	1.0	1	7	-7	-5
Fuels	401	10.5	7.3	1	1	-26	19
Non-ferrous metals	99	2.1	1.8	3	7	-4	-1
Manufactures	4186	70.5	76.5	6	5	1	4
Iron and steel	126	3.1	2.3	2	3	-2	-11
Chemicals	526	8.7	9.6	7	4	1	4
Other semi-manufactures	414	7.8	7.6	5	1	0	3
Machinery and transport equipment	2295	35.8	41.9	7	6	3	5
Automotive products	549	9.4	10.0	6	5	5	5
Office and telecom equipment	769	8.8	14.1	11	10	0	10
Other machinery and transport equipment	976	17.6	17.8	6	4	3	1
Textiles	148	3.1	2.7	4	4	-4	-2
Clothing	186	3.2	3.4	6	11	1	1
Other consumer goods	492	8.8	9.0	6	5	0	4

a Includes unspecified products. They accounted for 3 per cent of world merchandise exports in 1999.

Chart IV.2

## World exports of commercial services by category, 1990, 1995 and 1999

(Percentage)

Table IV.2

## World exports of commercial services by category, 1999

(Billion dollars and percentage)

	Value	Share		Annual percentage change			
	1999	1990	1999	1990-99	1997	1998	1999
All commercial services	1350	100.0	100.0	6	4	1	1
Transportation	310	28.5	23.0	4	2	-1	1
Travel	440	33.8	32.8	6	0	0	2
Other commercial services	600	37.7	44.2	8	8	2	1

Note: Exports of transportation services are significantly under-reported. See the Technical Notes.

## 2. Agricultural products

a Includes significant re-exports.

b Figures for 1989 refer to the former Federal Republic of Germany.

c Beginning with 1998, figures refer to South Africa only and no longer to the South African Customs Union.

*Note:* Breaks in the continuity of the value series for particular countries and regional groupings are indicated by an 'I'.

They result from (i) major adjustments in trade conversion factors for countries in Central and Eastern Europe, and in the former USSR; (ii) changes in political boundaries;

(iii) inclusion of the Baltic States and the CIS mutual trade beginning with 1996; and (iv) changes in the methods of collecting and reporting merchandise trade statistics.

Details are in the Technical Notes.

It should be noted that the World and Asia totals contain a significant element of double counting due to the use of the general system of recording merchandise trade statistics which includes re-exports.

Recent figures for a number of countries and territories have been estimated by the Secretariat.

a Includes significant imports for re-export.

b Figures for 1989 refer to the former Federal Republic of Germany.

c Imports are valued f.o.b.

d Beginning with 1998, figures refer to South Africa only and no longer to the South African Customs Union.

Note: Breaks in the continuity of the value series for particular countries and regional groupings are indicated by an 'I'.

They result from (i) major adjustments in trade conversion factors for countries in Central and Eastern Europe, and in the former USSR; (ii) changes in political boundaries;

(iii) inclusion of the Baltic States and the CIS mutual trade beginning with 1996; and (iv) changes in the methods of collecting and reporting merchandise trade statistics.

Details are in the Technical Notes.

It should be noted that the World and Asia totals contain a significant element of double counting due to the use of the general system of recording merchandise trade statistics which includes imports for re-exports.

Recent figures for a number of countries and territories have been estimated by the Secretariat.

a Includes unspecified products.

b Includes unspecified destinations and origins.

Note: The figures are affected by the "INTRASTAT" system of recording trade between EU member States. Unspecified products account for 4.3 per cent of total intra-EU trade, and intra-EU imports are under-recorded. To compensate for this under-recording, intra-EU exports have been used to obtain total (World) imports. Major trading partners were selected on the basis of 1998 data. 1999 exports and imports have been partly estimated by the Secretariat. See the Technical Notes.

a Includes unspecified products.

b Includes unspecified destinations and origins.

Note: A substantial proportion of Hong Kong, China's merchandise exports and imports is made up of re-exports. Hong Kong, China's total exports, as reported above, are listed separately for domestic (national) exports and for re-exports in Appendix Table A17. For sources and methods, see the Technical Notes.

Table A17

## Domestic exports and re-exports of merchandise by product, region and major trading partner,

# TECHNICAL NOTES

This Note details the definitions, methods and sources of the statistics used in *International Trade Statistics 2000*.

## I. Composition of country groups

### 1. Regions

*North America* : Canada, United States of America, and territories in North America n.e.s.

*Latin America* : Antigua and Barbuda, Argentina, Bahamas, Barbados, Belize, Bolivia, Brazil, Chile, Colombia, Costa Rica, Cuba, Dominica, Dominican Republic, Ecuador, El Salvador, Grenada, Guatemala, Guyana, Haiti, Honduras, Jamaica, Mexico, Netherlands Antilles, Nicaragua, Panama, Paraguay, Peru, Saint Kitts and Nevis, Saint Lucia, Saint Vincent and the Grenadines, Suriname, Trinidad and Tobago, Uruguay, Venezuela and other countries and territories in Latin America n.e.s.

*Western Europe* : Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Liechtenstein, Luxembourg, Malta, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland, Turkey, United Kingdom, Bosnia and Herzegovina, Croatia, former Yugoslav Republic of Macedonia, Slovenia, Yugoslavia (the last five countries mentioned comprise the former Yugoslavia), and territories in Western Europe n.e.s.

*Central and Eastern Europe, the Baltic States and the Commonwealth of Independent States (transition economies)*, of which *Central and Eastern Europe* : Albania, Bulgaria, Czech Republic, Hungary, Poland, Romania and the Slovak Republic ; *the Baltic States* : Estonia, Latvia and Lithuania ; and *the Commonwealth of Independent States (CIS)* : Armenia, Azerbaijan, Belarus, Georgia, Kazakhstan, Kyrgyzstan, Republic of Moldova, Russian Federation, Tajikistan, Turkmenistan, Ukraine and Uzbekistan. The grouping *former USSR* refers to the Baltic States and the CIS.

*Africa*, of which *North Africa* : Algeria, Egypt, Libyan Arab Jamahiriya, Morocco and Tunisia ; and *Sub-Saharan Africa* comprising : *Western Africa* : Benin, Burkina Faso, Cape Verde, Côte d'Ivoire, Gambia, Ghana, Guinea, Guinea-Bissau, Liberia, Mali, Mauritania, Niger, Nigeria, Senegal, Sierra Leone and Togo ; *Central Africa* : Burundi, Cameroon, Central African Republic, Chad, Congo, Democratic Republic of the Congo, Equatorial Guinea, Gabon, Rwanda, and Sao Tome and Principe ; *Eastern Africa* : Comoros, Djibouti, Eritrea, Ethiopia, Kenya, Madagascar, Mauritius, Seychelles, Somalia, Sudan, United Republic of Tanzania and Uganda ; and *Southern Africa* : Angola, Botswana, Lesotho, Malawi, Mozambique, Namibia, South Africa, Swaziland, Zambia, Zimbabwe and territories in Africa n.e.s.

*The Middle East* : Bahrain, Cyprus, Iraq, Islamic Republic of Iran, Israel, Jordan, Kuwait, Lebanon, Oman, Qatar, Saudi Arabia, Syrian Arab Republic, United Arab Emirates, Yemen and other countries and territories in the Middle East n.e.s.

*Asia*, of which *West Asia* : Afghanistan, Bangladesh, Bhutan, India, Maldives, Nepal, Pakistan and Sri Lanka ; and *East Asia (incl. Oceania)* : Australia ; Brunei Darussalam ; Cambodia ; China ; Fiji ; Hong Kong Special Administrative Region of China (Hong Kong, China) ; Indonesia ; Japan ; Kiribati ; Lao People's Democratic Republic ; Macau, China ; Malaysia ; Mongolia ; Myanmar ; New Zealand ; Papua New Guinea ; Philippines ; Republic of Korea ; Samoa ; Separate Customs Territory of Taiwan, Penghu, Kinmen and Matsu (Taipei, Chinese) ;

Singapore ; Solomon Islands ; Thailand ; Tonga ; Tuvalu ; Vanuatu ; Viet Nam and other countries and territories in Asia and the Pacific n.e.s.

### 2. Other country groups

*ANDEAN* : Bolivia, Colombia, Ecuador, Peru and Venezuela.

*APEC* : Australia ; Brunei Darussalam ; Canada ; Chile ; China ; Hong Kong, China ; Indonesia ; Japan ; Republic of Korea ; Malaysia ; Mexico ; New Zealand ; Papua New Guinea ; Peru ; Philippines ; Russian Federation ; Singapore ; Taipei, Chinese ; Thailand ; United States of America and Viet Nam.

*ASEAN* : Brunei Darussalam, Cambodia, Indonesia, Lao People's Democratic Republic, Malaysia, Myanmar, Philippines, Singapore, Thailand and Viet Nam.

*CEFTA* : Czech Republic, Hungary, Poland, Romania, Slovenia and the Slovak Republic.

*EUROPEAN UNION* : Austria, Belgium, Denmark, Finland, France, Germany, Greece, Ireland, Italy, Luxembourg, Netherlands, Portugal, Spain, Sweden and the United Kingdom.

*Least-developed countries* : Afghanistan, Angola, Bangladesh, Benin, Bhutan, Burkina Faso, Burundi, Cambodia, Cape Verde, Central African Republic, Chad, Comoros, Democratic Republic of the Congo, Djibouti, Equatorial Guinea, Eritrea, Ethiopia, Gambia, Guinea, Guinea-Bissau, Haiti, Kiribati, Lao People's Democratic Republic, Lesotho, Liberia, Madagascar, Malawi, Maldives, Mali, Mauritania, Mozambique, Myanmar, Nepal, Niger, Rwanda, Samoa, Sao Tome and Principe, Sierra Leone, Solomon Islands, Somalia, Sudan, Togo, Tuvalu, Uganda, United Republic of Tanzania, Vanuatu, Yemen and Zambia.

*MERCOSUR* : Argentina, Brazil, Paraguay and Uruguay.

*NAFTA* : Canada, Mexico and the United States of America.

*SAPTA* : Bangladesh, Bhutan, India, Maldives, Nepal, Pakistan and Sri Lanka.

*Six East Asian traders* : Hong Kong, China ; Malaysia ; Republic of Korea ; Singapore ; Taipei, Chinese and Thailand.

The designations used in this report do not imply an expression of opinion by the Secretariat concerning either the status of any country, territory or area, or the delimitation of its frontiers.

### 3. Political boundaries

Changes in political boundaries since 1991 involving the former Czech and Slovak Federal Republic, the former Yugoslavia and the former USSR are reflected in this report, as far as available statistics permit. This means that, beginning with 1992, data for these former entities are no longer given. This information is replaced with data for their successor states. In the case of the successor states to the former Czech and Slovak Federal Republic and the former Yugoslavia, the statistics include their mutual trade. In the case of the successor states of the former USSR, the absence of detailed merchandise trade statistics for most of them has ruled out the inclusion of their mutual trade at the disaggregated product level, as well as, for comparability reason, at the aggregate level. However, recent improvements in data collection have meant that mutual trade between the successor states of the former USSR has been included systematically in the tables, starting with data for 1996. The effects on the continuity of the data series are explained in Section III.2 below.

## II. DEFINITIONS AND METHODS

### II.1 Merchandise trade

#### 1. Exports and imports

Two systems of recording merchandise exports and imports are in common use. They are referred to as *general trade* and *special trade* and differ mainly in the way warehoused and re-exported goods are treated. General trade figures are larger than the corresponding special trade figures because the latter exclude certain trade flows, such as goods shipped through bonded warehouses.

Unless otherwise noted, total merchandise trade is defined in this report according to the general trade definition. It covers all types of inward and outward movement of goods through a country or territory including movements through customs warehouses and free zones. For further explanations, see United Nations *International Trade Statistics, Concepts and Definitions*, Series M, N° 52, Revision 2.

Unless otherwise indicated, exports are valued at transaction value, including the cost of transportation and insurance to bring the merchandise to the frontier of the exporting country or territory (f.o.b. valuation). Imports are valued at transaction value plus the cost of transportation and insurance to the frontier of the importing country or territory (c.i.f. valuation).

#### 2. Products

All product groups are defined according to Revision 3 of the Standard International Trade Classification (SITC).

The following groupings are used in this report :

##### A. Primary products

###### (i) *Agricultural products*

- *Food* : food and live animals ; beverages and tobacco ; animal and vegetable oils, fats and waxes ; oilseeds and oleaginous fruit (SITC sections 0, 1, 4 and division 22).

- *Raw materials* : hides, skins and furskins, raw ; crude rubber (including synthetic and reclaimed) ; cork and wood ; pulp and waste paper ; textile fibres and their wastes ; crude animal and vegetable materials, n.e.s. (SITC divisions 21, 23, 24, 25, 26, 29).

###### (ii) *Mining products*

- *Ores and other minerals* : crude fertilizers (other than those classified in chemicals) and crude minerals ; metalliferous ores and metal scrap (SITC divisions 27, 28).

- *Fuels* : (SITC section 3).

- *Non-ferrous metals* : (SITC division 68).

B. *Manufactures* : (SITC sections 5, 6, 7, 8 minus division 68 and group 891)

(i) *Iron and steel* : (SITC division 67).

(ii) *Chemicals* : organic chemicals (SITC division 51) ; plastics (SITC divisions 57, 58) ; inorganic chemicals (SITC division 52) ; pharmaceuticals (SITC division 54) ; other chemicals (SITC divisions 53, 55, 56, 59).

(iii) *Other semi-manufactures* : leather, leather manufactures, n.e.s., and dressed furskins ; rubber manufactures, n.e.s. ; cork and wood manufactures (excluding furniture) ; paper, paperboard and articles of paper pulp, of paper or of paperboard ; non-metallic mineral manufactures, n.e.s. ; manufactures of metals, n.e.s. (SITC divisions 61, 62, 63, 64, 66, 69).

(iv) *Machinery and transport equipment* : power generating machinery ; other non-electrical machinery ; office machines and telecommunications equipment ; electrical

machinery and apparatus ; automotive products ; other transport equipment (SITC section 7).

- *Power generating machinery* : power generating machinery and equipment minus internal combustion piston engines, and parts thereof, n.e.s. (SITC division 71 minus group 713).

- *Other non-electrical machinery* : machinery specialized for particular industries ; metalworking machinery ; general industrial machinery and equipment, n.e.s., and machine parts, n.e.s. (SITC divisions 72, 73, 74).

- *Office machines and telecommunications equipment* : office machines and automatic data processing machines ; telecommunications and sound recording and reproducing apparatus and equipment ; thermionic, cold cathode or photo-cathode valves and tubes (SITC divisions 75, 76 and group 776).

- *Electrical machinery and apparatus* : electrical machinery, apparatus and appliances, n.e.s., and electrical parts thereof ; minus thermionic, cold cathode or photo-cathode valves and tubes ; minus electrical equipment, n.e.s., for internal combustion engines and vehicles, and parts thereof (SITC division 77 minus group 776 and subgroup 7783).

- *Automotive products* : motor cars and other motor vehicles principally designed for the transport of persons (other than public transport type vehicles) including station wagons and racing cars ; motor vehicles for the transport of goods and special purpose motor vehicles ; road motor vehicles, n.e.s. ; parts and accessories of motor vehicles and tractors ; internal combustion piston engines for vehicles listed above ; electrical equipment, n.e.s., for internal combustion engines and vehicles, and parts thereof (SITC groups 781, 782, 783, 784, and subgroups 7132, 7783).

- *Other transport equipment* : other transport equipment (railway vehicles, aircraft, spacecraft, ships and boats, and associated parts and equipment) ; motorcycles and cycles, motorized and non-motorized ; trailers and semi-trailers, other vehicles (not mechanically propelled), and specially designed and equipped transport containers ; internal combustion piston engines for aircraft, and parts thereof, n.e.s. ; internal combustion piston engines, marine propulsion ; internal combustion piston engines, n.e.s. ; parts, n.e.s., for internal combustion piston engines listed above (SITC division 79, groups 785, 786, and subgroups 7131, 7133, 7138, 7139).

(v) *Textiles* : (SITC division 65).

(vi) *Clothing* : (SITC division 84).

(vii) *Other consumer goods* : household articles, travel goods, footwear, instruments and apparatus, photography, optical goods, watches and clocks, and other manufactured articles, n.e.s. (SITC divisions 81, 82, 83, 85, 87, 88, 89 excluding group 891, arms and ammunition).

C. *Other products* : commodities and transactions not classified elsewhere (including gold) ; arms and ammunition (SITC section 9 and group 891).

#### 3. Coverage

Trade flowing through processing zones is not systematically recorded in national trade statistics and can result in significant under-recording of trade in certain goods. For example, the exclusion of these flows from the statistics for Central American and Caribbean countries has resulted in under-recording of their trade in clothing. When included, practices for classifying the

goods involved also differ between countries. In recent years, however, improvements in data collection have resulted in the inclusion of processing trade for a number of countries including Costa Rica, Czech Republic, Hungary, Lithuania, Mexico, Morocco and the Ukraine. In all but one of these countries, this has resulted in breaks in the continuity of the data series. In the case of Mexico, trade flows through the special manufacturing zone known as the « maquiladoras » were previously excluded from official trade statistics, but reported separately by the Banco de México. The Secretariat included these flows in Mexico's exports and imports given their magnitude (ranging from 29 to 40 per cent of combined trade during the 1989-99 period). These shipments have been included in Mexico's official trade statistics since 1992.

#### 4. World trade network

The world merchandise trade network by region and product from which Appendix tables A2 and A7 are derived is based on export data. The network is constructed in the following way :

First, total merchandise exports from each of the seven regions are aggregated from country figures published by the International Monetary Fund in *International Financial Statistics*, other international organizations, and national statistical authorities. They are supplemented by Secretariat estimates (see Appendix table A3).

Next, the total merchandise exports of each region are distributed by destination and then by product. The regional and commodity breakdown is based on OECD, *Monthly Statistics of Foreign Trade* ; UNSD, *Comtrade database*, *International Trade Statistics Yearbook*, and *Monthly Bulletin of Statistics* ; national statistics and Secretariat estimates.

During this process, the principal adjustments to the figures are as follows :

- (i) Exports of ships to the open registry countries Panama and Liberia are re-allocated from each region's exports to Latin America and Africa to « unspecified destinations » (a category not shown separately).
- (ii) Re-exports of Hong Kong, China are excluded. This is because the magnitude of Hong Kong, China's re-exports (9.8 per cent of Asian total merchandise exports in 1999) would introduce a significant element of double counting into the trade of the Asian region since a large proportion of Hong Kong, China's re-exports are goods of Chinese origin or have China as final destination.
- (iii) China's exports are adjusted to approximate their final destination.
- (iv) Exports of military goods and non-monetary gold, where known, are included. When they cannot be broken down by destination, they are allocated to « unspecified destinations ».

#### 5. Merchandise trade of selected major traders by product, region and major trading partner (Appendix tables A8 to A20)

These tables are derived from the UNSD *Comtrade database*. The figures in the tables for total merchandise trade are not necessarily the same as those in Appendix tables A3 and A4 (see Section III.1 below). For trade by product, world totals include shipments which have not been distinguished by origin or destination. For trade by region and partner, world totals include goods which have not been specified by product. The following adjustments have been made to the figures :

- (i) Exports of ships to the open registry countries Panama and Liberia are re-allocated from each economy's exports to Latin America and Africa to « unspecified destinations » (a category not shown separately).

- (ii) Merchandise trade of the European Union (Appendix tables A11 to A14)
  - part of Belgian imports included in « other products » are re-allocated to « automotive products » ;
  - French trade in military goods is included. It is allocated to « other products » and « unspecified origins and destinations ».
  - official supplementary estimates of intra-EU exports and intra-EU imports beginning with 1993 that have not been transmitted to UNSD by the statistical authorities of EU member countries are included. For the United Kingdom, supplementary estimates have been distributed by product using national statistics. For other countries, whenever relevant, the figures have been allocated to « other products ».
  - for the combined trade of EU member States (Appendix table A11), intra-imports have been replaced by intra-exports beginning with 1993 to partly compensate for the observed under-reporting of intra-imports resulting from INTRASTAT procedures (see Section III below).

Selection of each reporter's major trading partners is based on a ranking of total trade (exports plus imports) of each reporter with their trading partners in 1999 (member States of the EU are counted as one trading partner).

#### 6. Merchandise trade in balance of payments statistics

Merchandise trade statistics together with other basic statistical systems (such as industrial and transport statistics) provide the foundation for the system of national accounts (SNA) and the balance of payments (BOP). Merchandise trade statistics are basic to the compilation of the goods account in the balance of payments as structured and defined in the fifth edition of the International Monetary Fund's Balance of Payments Manual (BPM5).

Goods (merchandise) are defined in the SNA as « physical objects for which a demand exists, over which ownership rights can be established and whose ownership can be transferred from one institutional unit to another by engaging in transactions on markets ». Thus, for the SNA and BOP statistics the recording of transactions should be based on the change of ownership principle.

However, the compilation of international merchandise trade statistics (ITS) is usually based on customs records which essentially reflect the physical movement of goods across borders, and follow international guidelines on concepts and definitions which do not fully conform to the principles of the SNA and the BPM5.

A number of adjustments have to be made to international merchandise trade statistics before they match the specific requirements of national accounts and balance of payments statistics. For aggregate exports and imports these adjustments are mainly related to coverage, the system of trade, and valuation.

With respect to coverage, the ITS in most instances conforms with the BPM5. Differences remain for the following cases :

- (i) *transactions that represent services transactions* (e.g. blueprints, videos, and tapes) should be valued in ITS at the value of the material in which they are incorporated, while under BPM5 these transactions should be excluded from goods and included, at market value, in services ;
- (ii) *transactions in which one or both national boundaries are not crossed* (e.g. trade in vessels and aircraft, exports of bunkers, etc.) are not always included in ITS for practical reasons, whereas they are usually included in BOP statistics ;
- (iii) goods under the *improvement and repair trade* regime should be excluded from ITS, but they are to be included at the value of the repair under the BPM5.

Concerning the system of trade, the ITS guidelines outline the measurement of trade flows on the basis of (1) the special trade system and (2) the general trade system. Under the special trade system, the customs frontier is regarded as the statistical boundary whereas, under the general system of trade, the national frontier is regarded as the statistical boundary. The BPM5 stresses that measurement for BOP compilation should be based on change of ownership rather than on the general trade system or the special trade system. The general trade system appears to be a better proxy for measuring change of ownership because it provides broader coverage and the date of change of ownership may be closer to the date goods cross the national frontier than to the date goods clear through customs.

As far as valuation is concerned, the issue that affects most data comparability concerns the point of valuation, namely, whether goods are valued at the importer's border – that is at the c.i.f. value – or at the f.o.b. value at the exporter's border. ITS guidelines recommend the adoption of the c.i.f. valuation for imports whereas BPM5 requires the f.o.b. valuation. Additional adjustments may be made by BOP compilers to conform to the BPM5 requirement for a market price for valuing trade, processing trade, and with respect to currency conversion.

Once adjusted, merchandise trade is recorded in the goods category of the current account, along with services, income, and current transfers. Therefore, within the balance of payments framework transactions in both goods and services are harmonized and provide for comparable statistical series, as in Table I.8. It is not strictly speaking correct to aggregate the figures for commercial services and merchandise shown elsewhere in this report.

It should be noted that some countries still apply the concepts of the fourth edition of the Balance of Payments Manual, and thus do not include goods for processing and goods procured in port carriers in the goods account.

## II.2 Trade in commercial services

### 1. Exports and imports

Exports (credits) and imports (debits) of commercial services are derived from statistics on international service transactions included in the balance of payments statistics provided by the International Monetary Fund (IMF). They conform to the concepts, definitions and classification of the fourth (1977) or fifth (1993) edition of the IMF Balance of Payments Manual. For countries that do not report to the IMF data are drawn from national statistics e.g., Hong Kong, China ; Macau, China ; and Taipei, Chinese. Estimations for missing data are mainly based on national statistics.

### 2. Definition of commercial services

In the fifth edition of the Balance of Payments Manual, the current account is subdivided into *goods*, *services* (including *government services, n.i.e.*), *income* (investment income and compensation of employees), and *current transfers*. The *commercial services* category in this report is defined as being equal to *services* minus *government services, n.i.e.* *Commercial services* is further sub-divided into *transport*, *travel*, and *other commercial services*.

Transport covers all transportation services (sea, air and other – including land, internal waterway, space and pipeline) that are performed by residents of one economy for those of another, and that involve the carriage of passengers, the movement of goods (freight), rentals (charters) of carriers with crew, and related supporting and auxiliary services.

*Travel* includes goods and services acquired by personal travellers, for health, education or other purposes, and by business travellers. Unlike other services, travel is not a specific type of service, but an assortment of goods and services consumed by travellers. The most common goods and services covered are lodging, food and beverages, entertainment and transportation (within the economy visited), gifts and souvenirs.

*Other commercial services* corresponds to the following components defined in BPM5 :

- (i) *communication services* (telecommunications, postal and courier services) ;
- (ii) *construction services* ;
- (iii) *insurance services* ;
- (iv) *financial services* ;
- (v) *computer and information services* (including news agency services) ;
- (vi) *royalties and licence fees*, covering payments and receipts for the use of intangible non-financial assets and proprietary rights, such as patents, copyrights, trademarks, industrial processes, and franchises ;
- (vii) *other business services*, comprising trade related services, operational leasing (rentals), and miscellaneous business, professional and technical services such as legal, accounting, management consulting, public relations services, advertising, market research and public opinion polling, research and development services, architectural, engineering, and other technical services, agricultural, mining and on-site processing ;
- (viii) *personal, cultural, and recreational services* including audiovisual services.

### 3. Coverage and comparability

Although in recent years the coverage and comparability of services trade data have improved, recorded trade figures still lack comparability across countries and are subject to significant distortions.

*First*, some countries do not collect statistics for certain service categories. *Second*, some service transactions are simply not registered. If central bank records are used, situations where no financial intermediaries are employed are not counted. In the case of surveys, the coverage of trading establishments is often incomplete. A particularly serious problem is that services transmitted electronically are frequently unregistered, especially when the transactions take place within multinational corporations. *Third*, statistics may be reported on a net rather than on a gross basis, often as a result of compensation arrangements such as in rail transport or in communication services. *Fourth*, the alternate sources used for countries which are not members of the IMF do not necessarily comply with the IMF concepts and definitions. *Fifth*, misclassification of transactions may lead to an underestimation of commercial services when service transactions are registered as income, transfers or trade in merchandise rather than trade in services or, conversely, to an overestimation of commercial services when transactions pertaining to income, transfers or official transactions are registered in the private service categories.

The implementation of BPM5 will result in an improvement of country comparability over time. However, given that these improvements are being made gradually, they also result in a number of breaks in series. The borderline between goods and services, as well as the borderlines between the components of commercial services differ in BPM4 and BPM5. Examples of such differences are :

- (i) most processing transactions are included under *goods* on a gross basis in BPM5, while in BPM4 only the value of the fees paid for processing are included in services ;

- (ii) goods procured in ports, such as fuels and provisions, are included in *goods* in BPM5, and in services (*transport*) in BPM4 ;
- (iii) in BPM4, insurance services are normally measured by the net premiums defined as premiums less claims, while in BPM5, *insurance services* reflects the « normal » service charge, i.e. administrative services and part of the earnings ; the rest of the net premiums or the actual risk premiums is recorded under current transfers or in the financial account in case of life insurance ; in addition, freight insurance is part of transport in BPM4, and part of insurance services in BPM5 ; and
- (iv) the expenditure of seasonal and border workers is included in labour income in BPM4, and in *travel* in BPM5.

## II.3 Other definitions and methods

### 1. Annual changes

Throughout this report, average annual percentage changes are analogous to compound interest rates. In calculating the average annual rate of change between 1990 and 1999, for example, data for calendar year 1990 were taken as the beginning point, and data for calendar year 1999 as the end point.

### 2. Commodity prices

Commodity price movements are primarily described by indices largely based on spot market prices, and therefore exclude transactions governed by longer-term contracts. Price indices for such commodities as food, beverages, agricultural raw materials, minerals, non-ferrous metals, fertilizers and crude petroleum are obtained from IMF *International Financial Statistics*. Aggregates for all primary commodities and for non-fuel primary commodities are calculated using IMF weights.

### 3. Merchandise trade volume and unit value indices

The volume and unit value indices are taken from a range of different international and national sources. The reported volume and unit value indices may not always be available for the most recent years or may differ in product coverage from the corresponding value indices. For example, the indices reported by France exclude electricity, military and railway equipment, electronics, analysing and controlling instruments, shipbuilding and aeronautics, and machine tools. Switzerland excludes jewellery, antiques, and precious metals from its indices.

Aggregation of the indices to obtain a world total is a two-tier process. *First*, export and import unit values are adjusted to the extent possible for differences in coverage and, in cases of missing data, completed with Secretariat estimates. They are then aggregated to obtain regional totals. The volume index for each region is obtained by dividing the respective trade value index for each region by the corresponding regional unit value index.

*Second*, to obtain the total world merchandise volume index, regional unit value indices are aggregated and the world trade value is deflated by the world unit value index. Throughout the aggregation process trade values of the previous year are used as weights.

### 4. World production

Production of agriculture, mining and manufacturing is defined according to major Divisions 1, 2 and 3 of the International Standard Industrial Classification (ISIC). World production in these sectors is estimated by combining production indices published by the FAO, IMF, OECD, UNIDO and UNSD. The world index is derived through aggregation of the three sectors by using value added shares in 1990 as weights.

### 5. World gross domestic product

World GDP growth is estimated as a weighted average of economies' real GDP growth. The weights used are shares of economies in 1990 world nominal GDP converted to dollars at market exchange rates.

The use of official exchange rates which are not market-based for some major economies, together with the fluctuations of the United States dollar vis-à-vis major currencies can have a significant impact on the weighting pattern. The increasing use of weights based on purchasing power parities (PPP) by other international organizations is meant to attenuate « anomalies » linked to these factors. In a period of widely diverging growth rates among countries and regions, the choice of the weighting pattern can have a marked influence on the global growth estimate. For the 1990-99 period, global growth estimates based on PPP-weights indicate a significantly faster growth than estimates using weights based on GDP data measured at market exchange rates. This is because of differences in the two weighting patterns. Relative to weights based on GDP at market exchange rates, PPP weights are low for the transition economies - especially the successor States of the former USSR with a poor growth record, and high for major developing countries (in particular China) with above average growth.

### 6. Re-exports

Under the system of general trade adopted in this report, re-exports are included in total merchandise trade (see Section II.1). However, in the case of Hong Kong, China, the magnitude of its re-exports (amounting in 1999 to \$152 billion), if included in regional or world aggregates, would adversely affect the analytical value of the statistics by introducing a significant element of double counting. Therefore, Hong Kong, China's re-exports are excluded from the world and from Asia aggregates (unless otherwise indicated) ; only Hong Kong, China's domestic exports and retained imports are included in the totals. For this reason, the figures for world exports and for exports of Asia shown in Appendix tables A2 and A7 are smaller than those in Appendix table A3. Since retained imports cannot be identified from imports directly, an approximation is derived by subtracting the value of re-exports from the value of imports. The resulting figure will, however, under-estimate the value of retained imports by the amount of the re-export margin.

## III. Breaks in data continuity

### 1. Merchandise trade statistics of the European Union

The introduction of a new system for collecting statistics on trade between the member States of the EU in January 1993 – INTRASTAT – which was briefly described in the GATT annual report 1994, *International Trade Trends and Statistics*, has affected EU merchandise trade statistics in a number of ways. The system has resulted in the loss of continuity with pre-1993 trade figures. Difficulties in implementing the new system have resulted in reporting delays and numerous revisions in the figures. More generally, the EU intra-trade statistics collected through INTRASTAT are markedly less accurate than statistics collected under the previous system.

The coverage of the current system, which relies on reports submitted by firms for transactions above a minimum value, is not as wide as the previous one, which was based on customs declarations. Estimates for non-response and exemptions from reporting obligations are made by the statistical authorities of some member States but these estimates cannot always be

broken down by product, and they most probably under-record the actual trade flows, so that continuity with pre-1993 figures has been lost. In some cases, as well, estimates of under-reporting have not been included in submissions to the United Nations Statistical Division for inclusion in the *Comtrade database*, which has also contributed to a marked disruption in the continuity of the Secretariat's traditional data source.

Prior to the adoption of the current system, reported intra-EU imports (c.i.f.) closely matched reported intra-EU exports (f.o.b.). From 1993, however, the reported value of intra-EU imports has been on average around 5 per cent below the value of intra-EU exports, indicating a substantial under-reporting of intra-EU imports. Given the significance of this inconsistency, the Secretariat has used intra-EU export data to adjust for the under-reporting of intra-EU imports. However, this adjustment could not be allocated *between* EU member countries. As a result, the sum of reported imports of individual EU members does not add to the figure for EU imports as a whole (see, for example, Appendix Table A4). This adjustment is also reflected in the volume estimates for the EU as a whole.

Due to reporting delays to UNSD, the latest merchandise trade statistics for all EU member States were not available at the time the world trade network by region and product was prepared. As a result, the Secretariat has had to partly estimate the 1999 product breakdown of the EU.

The EU accounts for some 40 per cent of world merchandise trade. It is also the major market for the exports of Africa, the Middle East and the CIS – all regions for which detailed trade statistics are scarce. EU trade statistics, both for EU member countries and for trade with these partner countries, therefore play a key rôle in global trade statistics and are of particular importance in the construction of the world trade network by region and product. Reporting delays and the decline in the reliability of EU intra-trade statistics have resulted in an increase in the margin of error in the Secretariat's trade estimates.

Due to a change in the definition of the statistical territory, the merchandise trade statistics of France include trade of French Guiana, Guadeloupe, Martinique and Reunion beginning with 1996.

## 2. Merchandise trade of Central and Eastern Europe, the Baltic States and the CIS

Beginning in 1990, trade data for Bulgaria and the former USSR were converted into dollars at official, market-oriented exchange rates, replacing the earlier practice of using implicit conversion factors. This created breaks in continuity in the corresponding time series between 1989 and 1990. Valuation problems are discussed in more detail in Box 1 in Volume I of *International Trade 1990-91* and in Box 2 in Volume I of *International Trade 1989-90*.

Figures for the Czech Republic and the Slovak Republic include trade between these two countries. As regards the Baltic States and the CIS, trade figures cover their mutual exchanges starting with 1996. Total merchandise exchanges among these countries amounted to some \$44 billion in 1997, \$36 billion in 1998, and \$28 billion in 1999. The inclusion of the mutual trade has therefore resulted in substantial breaks in the continuity of the trade series at the country and regional levels between 1995 and 1996.

The political and economic upheavals in the region caused disruptions in statistical reporting systems. Although some countries improved or adapted their systems, detailed trade statistics are still not available for many country/periods (except for the Russian Federation). As a result, the Secretariat has estimated their trade largely on the basis of the statistics of their trading partners.

The implementation of internationally agreed concepts and definitions for collecting merchandise trade statistics will result in an improvement of country comparability over time. However, given that these improvements are being made gradually, they also result in a number of breaks in series. Breaks in the continuity in the trade figures were identified for the following countries : for the Czech Republic between 1992 and 1993, and for Hungary between 1995 and 1996 due to the inclusion of shipments through processing zones ; for Lithuania between 1994 and 1995 due to the change from the special to the general system of trade ; for Ukraine between 1994 and 1995 due to a change in data collection procedures and the inclusion of shipments through processing zones ; for the Slovak Republic between 1996 and 1997 and for Poland between 1997 and 1998 due to the introduction of new arrangements in customs procedures to harmonize with the standards of the European Union.

Considerable uncertainty remains about the accuracy of the foreign trade statistics of the Russian Federation, especially as regards imports. A large proportion of the reported data on imports consists of official estimates of inflows of goods which enter the country without being registered by the customs authorities. Such adjustments to import data accounted for 28, 26 and 27 per cent of the officially reported totals in 1997, 1998, and 1999 respectively ; on the export side, such adjustments accounted for about 4 per cent in all three years.

---

## IV. Statistical sources

Most frequently used sources for statistics are :  
EUROSTAT, *External and Intra-European Union Trade*  
FAO, *Production Yearbook*  
FAO, *Trade Yearbook*  
IMF, *Balance of Payments Statistics*  
IMF, *International Financial Statistics*  
OECD, *Main Economic Indicators*  
OECD, *National Accounts*  
OECD, *Monthly Statistics of Foreign Trade*  
OECD/IEA, *Energy Prices & Taxes*  
UNECE, *Economic Survey of Europe*  
UNIDO, *National Accounts Statistics Database*  
UNSD, *Comtrade database*  
UNSD, *International Trade Statistics Yearbook*  
UNSD, *Monthly Bulletin of Statistics*  
World Bank, *World Development Indicators*  
World Bank, *World Tables*

These sources are supplemented by national publications and Secretariat estimates.

The merchandise trade statistics in this report are largely derived from two sources. Figures for total merchandise trade are derived from IMF, *International Financial Statistics*. Data on merchandise trade by origin, destination and product come mainly from the UNSD *Comtrade database*. Some inconsistencies in the aggregate export and import data for the same country or territory between the two sources are inevitable. These can be attributed to the use of different systems of recording trade, to the way in which IMF and UNSD have converted data expressed in national currencies into dollars, and revisions which can be more readily incorporated in the IMF data.

Statistics on trade in commercial services are mainly drawn from the IMF *Balance of Payments Statistics*, and supplemented by national publications for countries that do not report to the IMF.

Acknowledgements are due to the Food and Agriculture Organization, the International Monetary Fund, the Organisation for Economic Cooperation and Development, the Statistical Office of the European Communities, the United Nations Economic Commission for Europe, the United Nations Statistics Division, the

United Nations Industrial Development Organization and the World Bank whose assistance in supplying advance copies of their publications as well as other information has greatly facilitated the work of the Secretariat. Acknowledgements are also due to national institutions for providing advance statistics.
